**Japanese Production Racing Motorcycles** Mick Walker, 2004-09-02 As this book explains the Japanese did not suddenly become proficient in the design and development of motorcycles when they first appeared in Europe at the end of the 1950s. Instead the Japanese had been involved with motorcycles since the beginning of the 20th century. True early Japanese motorcycles copied Western design a trend that continued for several years after WWII. But soon they designed a succession of highly innovative machinery not only to the Grand Prix world's benefit but to the paying over the counter customer too. Honda, Kawasaki, Suzuki and Yamaha plus Bridgestone and Tohatsu have all built and sold racing motorcycles which the public could also buy and enjoy. World's Fastest Motorcycles John Cutts, 1991-10 A completely revised and updated version of this popular book. The book covers the history of superbikes from the 1930s but mainly focuses on the modern bikes such as the extraordinary Honda NR750 and the Ducati 851 the fastest four stroke vee twin in the world. Full technical data is supplied for each of the approximately 35 bikes profiled. Further sections examine the technology of the superbike, look at the bikes of the future and provide tables of previous record breakers. 150 color illustrations.
