## Geography June 2013 Memo:

Reexamining Economic and Political Reforms in Russia, 1985-2000 Vladimir Gel'man, Dmitry Travin, Otar Marganiya, 2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixtiers and seventiers Representatives of the generation of sixtiers conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventiers who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms

**Heritage, Affect and Emotion** Divya P. Tolia-Kelly, Emma Waterton, Steve Watson, 2016-07-01 Heritage and its economies are driven by affective politics and consolidated through emotions such as pride awe joy and pain In the humanities and social sciences there is a widespread acknowledgement of the limits not only of language and subjectivity but also of visuality and representation Social scientists particularly within cultural geography and cultural studies have recently attempted to define and understand that which is more than representational through the development of theories of affect assemblage post humanism and actor network theory to name a few While there have been some recent attempts to draw these lines of thinking more forcefully into the field of heritage studies this book focuses for the first time on relating heritage with the politics of affect The volume argues that our engagements with heritage are almost entirely figured through the politics of affective registers such as pain loss joy nostalgia pleasure belonging or anger It brings together a number of contributions that collectively and with critical acuity question how researchers working in the field of heritage might begin to discover and describe affective experiences especially those that are shaped and expressed in moments and spaces that can be at times intensely personal intimately shared and ultimately social It explores current theoretical advances that enable heritage to be affected released from conventional understandings of both heritage as objects and objects as representations by opening it up to a range of new meanings emergent and formed in moments of encounter Whilst representational understandings of heritage are by no means made redundant through this agenda they are destabilized and can thus be judged anew in light of these developments Each chapter offers a novel and provocative contribution provided by an interdisciplinary team of researchers who are thinking theoretically about affect through landscapes practices of commemoration visitor experience site interpretation and other heritage work

Cordelia Fine, 2025-08-19 A razor sharp and quick witted analysis of why we need a new approach to fixing the gender inequality embedded in work Work remains much as it always has men occupy the vast majority of leadership roles and are overrepresented in positions from engineer to plumber We see many jobs as male or female with women dominating in healthcare and childcare professions Pretending that this is the natural state of things or that instead both sexes should submit to working 24 7 is just not right In Patriarchy Inc Cordelia Fine examines with razor sharp and quick witted analysis why gender inequality is embedded in the workplace and why it has to change Drawing on theories from evolutionary science psychology economics and sociology she examines two of the most prominent movements in the corporate world The Different But Equal viewpoint espouses that women are in the jobs they want despite their lower status and salaries In the meantime DEI Diversity Equity Inclusion has become a slogan that emphasizes productivity and profit not fair play Fine shows how both are wrong and the bad effects on everyone when men are still stuck in traditional breadwinner roles and women are having to fight for their due Offering perceptive and much needed insight into the current state of work Patriarchy Inc explores how we can get closer to achieving equality even if it means upturning business as usual *Report*, 1964 **Naval War College Review**, 2017 **The State of African Cities, 2014** United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant

overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
