Dept. of Geography and Environmental Studies, 1969 The Encyclopedia of Human Geography Barney Warf, 2026-02-23 This encyclopedia brings together a comprehensive collection of work highlighting established research and emerging science in all relevant disciplines in Human Geography It offers an overview of topics the origins and developments theories and contemporary approaches links to other issues policy implications and suggested readings It allows readers to gain quick overviews and to compare and contrast different views and topics Paying careful attention to empirical research and literature from around the globe the encyclopedia is of interest to a wide audience that includes researchers teachers and students policy makers non governmental agencies practitioners and many other individuals and organizations *Evolutionary Economic Geography* Dieter Kogler, 2017-10-02 Economic geographers increasingly consider the significance of history in shaping the contemporary socio economic landscape and increasingly believe that experiences and competencies acquired over time by individuals and entities in particular localities to a large degree determine present configurations as well as future regional trajectories Attempts to trace understand and investigate the pathways from past to present have given rise to the thriving and exciting sub field of Evolutionary Economic Geography EEG EEG highlights the important factors that initiate inhibit or consolidate the contextual settings and relationships in which regions and their respective agents which comprise and shape economic activity and social reproduction change over time It has at its core the production and destruction of novelty in space and the links between innovation and regional economic fortunes The creation of knowledge its movement and recombination within different regional ensembles of economic agents and institutions plays a critical role in the evolution of the space economy EEG provides a framework to disentangle the complexity of technological change and regional economic development based on a variety of theoretical and methodological approaches In only a short time EEG has established itself as a promising and rapidly evolving research framework with its focus on the driving forces of regional development across various scales and its attempt to translate findings into public policy This book advances the theoretical foundations of EEG and demonstrates how EEG utilises and operationalises conceptual frameworks both established and new Contributions also point to future research avenues and extensions of EEG attempting to build stronger ties between theory empirical evidence and relevance to policy This book was originally published as a special issue of *Regional Studies* **Handbook of Proximity Relations** Torre, André, Gallaud, Delphine, 2022-01-18 This Handbook is a state of the art analysis of proximity relations offering insights into its history alongside up to date scientific advances and emerging questions Its broad scope from industrial and innovation approaches through to society issues of living and working at a distance territorial development and environmental topics will ensure an in depth focus point for researchers in economics as well as geography organizational studies planning and sociology *Reconstructing Urban Economics* Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics the intellectual

bedrock of modern capitalism faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged. Yet there remains one field of economics where these limitations continue virtually unchallenged: the study of cities and regions in built environment economics. In this book, Franklin Obeng Odoom draws on institutional, Georgist, and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics. In doing so, he demonstrates the widespread tensions and contradictions in the status quo, showing how to reconstruct urban economics in order to create a more just society and environment.

Handbook on the Geographies of Innovation Richard Shearmur, Christophe Carrincazeaux, David Doloreux, 2016-11-25. The geography of innovation is changing. Firstly, it is increasingly understood that innovative firms and organizations exhibit a wide variety of strategies, each differently attuned to diverse geographic contexts. Secondly, and concomitantly, the idea that cities, clusters, and physical proximity are essential for innovation is evolving under the weight of new theorizing and empirical evidence. The aim of this handbook is to break with the many ideas and concepts that emerged during the course of the 1980s and 1990s and to fully take into account the new reality of the internet, mobile communication technologies, personal mobility, and globalization. The handbook gathers a new generation of ideas and authors to contribute to the debate, providing an empirically grounded, critical appraisal of the prevailing knowledge on the geography of innovation. The 28 original chapters, written by a diverse range of scholars with widely differing views, present fresh empirical evidence and new perspectives relating to how innovation plays out across space in an age where mobility has increased, information is ubiquitous, and globalisation has been realised. Overall, the dialogue between existing theory and new possibilities provides a unique and challenging appraisal of the connection between innovation, agglomeration, and space. Offering cutting-edge ideas in an accessible format, this will be an ideal resource for students and scholars of economic geography and innovation studies. The empirical evidence and analysis will also be of great value for policymakers and government officials. Contributors include: B. T. Asheim, H. W. Aslesen, A. Bain, P. A. Balland, N. Bradford, A.
