

Crayfish Dissection—Instructor Answer Key

Crayfish External Anatomy

Crayfish (also known as crawdads, crawfish, mudbugs, or yabbies), are common throughout the world. There are over 400 difference species of crayfish, 330 of which are native to the United States. Crayfish are commonly used as food, bait, and pets.

Like all crustaceans, a crayfish has a fairly hard exoskeleton that covers its body. As shown in the diagram, its body is divided into two main parts, the **cephalothorax** and the **abdomen**.

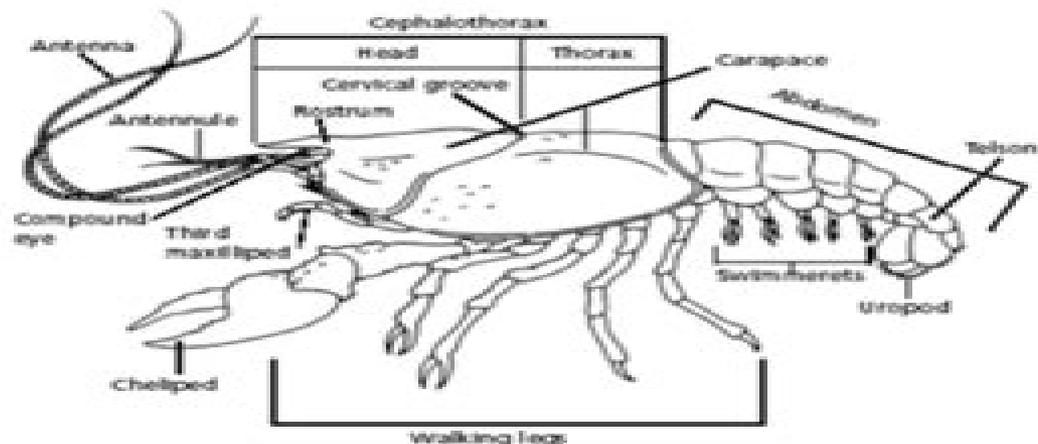

The cephalothorax consists of the cephalic (or head) region and the thoracic region. The part of the exoskeleton that covers the cephalothorax is called the **carapace**.

The abdomen is located behind the cephalothorax and consists of six clearly divided segments. The cephalothorax consists of 13 segments. Each segment of both the cephalothorax and the abdomen contains a pair of appendages.

The head (or cephalic) region has five pairs of appendages. The **antennules** are organs of balance, touch, and taste. Long **antennae** are organs for touch, taste, and smell. The mandibles, or jaws, crush food by moving from side to side. Two pairs of **maxillae** hold solid food, tear it, and pass it to the mouth. The second pair of maxillae also helps to draw water over the gills.

Of the eight pairs of appendages on the cephalothorax, the first three are **maxillipeds**, which hold food during eating. The **chelipeds** are the large claws that the crayfish uses for defense and to capture prey. Each of the four remaining segments contains a pair of **walking legs**. In the abdomen, the first five segments each have a pair of **swimmerets**, which create water currents and function in reproduction. The sixth segment contains a modified pair of **uropods**. In the middle of the uropods is a structure called the **telson**, which bears the anus. The uropod and telson together make up the tail fan. The crayfish moves *backward* by forcing water forward with its tail fan.

Fun Fact: 90% of all of the crayfish eaten in the world come from Louisiana. 70% of all the crayfish harvested in Louisiana are eaten in Louisiana.
