## CARE AND MAINTENANCE GUIDE

Polycor natural stone products are virtually maintenance-free and, when properly maintained, will provide long-term performance for generations to come.

### MAINTENANCE

Marble surfaces should be kept free of debris and soiling by periodically sweeping or by using a mechanical blower on the surface. When maintaining exterior hardscaping, the ideal is to wash it at periodic intervals (annually, depending on atmospheric conditions) by hosing down the areas with clean water. This will prevent the accumulation of dirt and impurities.

### CLEANING

Begin with a simple solution of mild detergent, and water. Then, scrub the surface with a soft bristle brush. Rinse with clean water to remove remaining cleaning solution. If more stubborn soiling exists, use an approved stone cleaner or pH neutral cleaner approved for marble. Never use wire brushes, acidic cleaners, bleach, paint remover, or any other type of concrete cleaner. Some stone cleaners also contain small amounts of sealer. These products help to maintain the level of protection. Brushes may be necessary for the removal of certain surface impurities. Soft fiber bristle brushes are recommended.

When dirt has accumulated on older surfaces over an extended period of time, a combination of methods may be necessary to properly clean the stone. A plain water jet, from a power washer, will typically remove most accumulation. Adjust the pressure on the machine accordingly and do not exceed 1,200 Psi, from a 45-degree fan-shaped nozzle, holding the tip no closer than 6 inches to the face of the marble. No chemicals should be used that could be harmful to the marble. Note, however, that even high-pressure water can cause damage. Proper pressure, nozzle size and working distance should be maintained consistently during the process.
