The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics

Nature-based Solutions for Sustainable Urban Planning Israa H. Mahmoud, Eugenio Morello, Fabiano Lemes de Oliveira, Davide Geneletti, 2022-03-04 Urban greening policies and measures have recently shown a high potential impact on the design and reshaping of the built environment especially in urban regeneration processes This book provides insights on analytical methods planning strategies and shared governance tools for successfully integrating Nature Based Solutions NBS in the urban planning practice The selected contributions present real life application cases in which the mainstreaming of NBS are investigated according to two main challenges the planning and designing of physical and spatial integration of NBS in cities on one side and the implementation of suitable shared governance models and co creation pathways on the other Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

The Atlas of Environmental Migration Dina Ionesco, Daria Mokhnacheva, François Gemenne, 2016-11-25 As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities the need to study its impact on human migration and population displacement has never been greater The Atlas of Environmental Migration is the

first illustrated publication mapping this complex phenomenon It clarifies terminology and concepts draws a typology of migration related to environment and climate change describes the multiple factors at play explains the challenges and highlights the opportunities related to this phenomenon Through elaborate maps diagrams illustrations case studies from all over the world based on the most updated international research findings the Atlas guides the reader from the roots of environmental migration through to governance In addition to the primary audience of students and scholars of environment studies climate change geography and migration it will also be of interest to researchers and students in politics economics and international relations departments

Food Production and Nature Conservation Iain J. Gordon, Herbert H.T. Prins, Geoff R. Squire, 2016-11-25 Feeding the world's growing human population is increasingly challenging especially as more people adopt a western diet and lifestyle Doing so without causing damage to nature poses an even greater challenge This book argues that in order to create a sustainable food supply whilst conserving nature agriculture and nature must be reconnected and approached together The authors demonstrate that while the links between nature and food production have to some extent already been recognized until now the focus has been to protect one from the impacts of the other Instead it is argued that nature and agriculture can and should work together and ultimately benefit from one another Chapters describe efforts to protect nature through globally connected protected area systems and illustrate how farming methods are being shaped to protect nature within agricultural systems The authors also point to many ways in which nature benefits agriculture through the ecosystem services it provides Overall the book shows that nature conservation and food production must be considered as equally important components of future solutions to meet the global demand for food in a manner that is sustainable for both the human population and the planet as a whole

Cases on Strategic Social Media Utilization in the Nonprofit Sector Asencio, Hugo, Sun, Rui, 2015-02-28 Typically utilized by larger corporations social media marketing and strategy is lacking in small and medium sized nonprofit organizations Although these organizations are beginning to incorporate this form of online communication there is still a need to understand the best practices and proper tools to enhance an organization's presence on the web Cases on Strategic Social Media Utilization in the Nonprofit Sector brings together cases and chapters in order to examine both the practical and theoretical components of creating an online social community for nonprofit organizations The technologies discussed in this publication provide organizations with the necessary cost effective tools for fundraising marketing and civic engagement This publication is an essential reference source for practitioners academicians researchers and advanced level students interested in learning how to effectively use social media technologies in the nonprofit sector

Development of a Process for Integrated Development and Evaluation of Energy Scenarios for Lower Saxony Bernd Engel, 2019-12-11 In the research project NEDS Sustainable Energy Supply Lower Saxony conceivable transition paths towards a power supply based on renewable energies in Lower Saxony by 2050 are developed and examined for their sustainability and feasibility Both the different technical focal points and the joint

development of methods and models represent important aspects of the project A comprehensive method for the integrated development and evaluation of energy scenarios is developed and applied to Lower Saxony As a basic framework five future scenarios for the target year 2050 are developed Based on the qualitative future scenarios and three chosen alternatives quantitative assumptions are made for the simulation and evaluation The simulation results of the system model form the basis for the system evaluation Defined system states for the transition years are simulated and then compared using a multi criteria decision analysis based on sustainability criteria In dem Forschungsprojekt NEDS Nachhaltige Energieversorgung Niedersachsen werden denkbare Transitionspfade hin zu einer auf erneuerbaren Energien basierenden Stromversorgung in Niedersachsen bis 2050 entwickelt und auf ihre Nachhaltigkeit und Umsetzbarkeit untersucht Sowohl die unterschiedlichen fachlichen Schwerpunkte als auch die gemeinsame Entwicklung von Methodik und Modellen stellen wichtige Aspekte im Projekt dar Es wird eine umfassende Methodik zur integrierten Entwicklung und Bewertung von Energieszenarien erarbeitet und auf Niedersachsen angewendet Als Grundger st werden f nf Zukunftsszenarien f r das Zieljahr 2050 entwickelt Aus den qualitativen Zukunftsszenarien und drei ausgew hlten Alternativen werden quantitative Annahmen f r die Simulation und Bewertung erstellt Die Ergebnisse der Simulationen des Systemmodells bilden die Grundlage f r die Systembewertung Definierte Systemzust nde f r die Transitionsjahre werden simuliert und anschlie end mithilfe einer multikriteriellen Bewertungsmethode anhand von Nachhaltigkeitskriterien verglichen

Public Infrastructure Management Frederick Bloetscher,2020-03-23 This book addresses the long term maintenance repair and replacement of public infrastructure in a practical cost effective manner something that is missing in the current literature Fixing our public infrastructure is essential for public health and safety and is fast becoming a national priority This title provides an overview of the major public works infrastructure systems water sanitary sewer stormwater roads bridges and railways including components operational goals maintenance areas where failure can occur and ways to address failure Risk and vulnerability to these systems are evaluated and guidance on how to create a condition index assessment given limited data is provided It also includes statistical methods to make an assessment more robust Recommendations on budgeting strategies and capital planning are also discussed and designed to bring the risk vulnerability and condition indices together into a thorough decision making process It is a must read for anyone involved in public infrastructure management including professional civil and environmental engineers utility managers local government managers and officials urban and regional planners and civil and environmental engineering students

Environmental Non-Governmental Organizations (NGOs) in Jordan. Challenges and Obstacles Lukas Habib,2015-07-22 Master s Thesis from the year 2015 in the subject Politics Topic International Organisations grade 2 0 University of Frankfurt Main course Internationale Studien language English abstract The Hashemite Kingdom of Jordan is characterized by a high vulnerability regarding climate change induced effects and environmental developments As governmental bodies seem to fail the task of preserving the human habitat environmental

NGOs are already filling a gap Likewise the cooperation with international organizations is also an important factor for the work of national NGOs This raises the question if and how the government of Jordan and international organization create obstacles for environmental NGOs After conducting an analysis inspired by grounded theory including a two step coding process of primary data it becomes obvious that environmental NGOs in Jordan are facing several challenges Firstly they are adopting governmental tasks Secondly NGOs are challenged by a high level of competition Thirdly they are confronted with difficulties created by international organizations and the government Furthermore those actors are in need of gaining financial security and to improve international cooperation within the Levant to diminish climate change induced effects negative environmental developments and to contribute to a sustainable environment
