Hdev Canadian Edition

Jarvis Peter

Hdev Canadian Edition:

HDEV, 5th Edition Spencer Rathus, Rebecca Rogerson, 2023-03-27 The fifth Canadian edition of HDEV focuses on current and relevant research in lifespan psychology using a biopsychosocial framework to engage students. It covers a range of topics including the impact of technology and social media, 2SLGBTQ issues, physician-assisted dying, and changing family dynamics. HDEV is a convenient and easy-to-reference paperback textbook that includes popular Chapter Review Cards that can be easily removed and referenced. Students will find this format helpful for their studying and learning. **HDEV, Second Canadian Edition** Spencer A. Rathus, Shauna Longmuir, 2014-02-15 Human Development Grace J. Craig, Don Baucum, 1999 Designed for students from a wide range of backgrounds, this text takes a chronological and interdisciplinary approach to human development. With its focus on context and culture, the 8th edition illustrates that the status of human development is inextricably embedded in a study of complex and changing cultures. Concepts and Theories of Human Development Richard M. Lerner, 2013-05-13 A classic in the field, this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development. This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives. Since the publication of the second edition, developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts, having either a nature or nurture emphasis. As a consequence, a developmental systems orientation frames the presentation in this edition. This new edition has been expanded substantially in comparison to the second edition. Special features include a separate chapter focusing on the historical roots of concepts and theories of human development, on philosophical models of development, and on developmental contextualism. Two new chapters surrounding the discussion of developmental contextualism: one on developmental systems theories wherein several exemplars of such models are discussed, and a corresponding chapter wherein key instances of such theories, life span, life course, bioecological, and action-theoretical ones are presented. A new chapter on cognition and development is included, contrasting systems approaches to cognitive development with neo-nativist perspectives. A more differentiated treatment of nature-oriented theories of development is provided. There are separate chapters on behavior genetics, the controversy surrounding the study of the heritability of intelligence, work on the instinctual theory of Konrad Lorenz, and a new chapter on sociobiology. A new chapter concentrates on applied developmental science. Rethinking Copyright for Sustainable Human Development Sileshi Bedasie Hirko, 2021-11-25 This book explores the interface between copyright and higher education and their complementarities for the advancement of sustainable human development. In its broader sense, the concept of human development is noted as a set of freedoms and human capabilities that are essential for human flourishing. Adopting a rights-based human development and capability approach, HDCA, this book primarily examines the relevant policy and legal

flexibilities under the existing international copyright system and their implications for access to knowledge required for creative innovation and higher education Exploring the interfaces between copyright and higher education this book argues that an unbalanced and restrictive copyright system impedes reasonable access to knowledge and stifles creative and learning freedoms or capabilities In effect a restrictive copyright system results in serious ramifications for sustainable human development In view of its findings this book underscores the need for rethinking copyright and reframing its relevant flexibilities as users rights that are vital for promoting creative and learning capabilities towards sustainable human development Further the book emphasizes the complementarities between copyright and higher education and their joint roles for sustainable human development Given its application of the HDCA to explore ranges of interlinked topics this book will be of a great interest to researchers across the fields of intellectual property law innovation global development human rights and higher education

Arctic Human Development Report Joan Nymand Larsen,Gail Fondahl,2015-02-18 The goals of the second volume of the AHDR Arctic Human Development Report Regional Processes and Global Linkages are to provide an update to the first AHDR 2004 in terms of an assessment of the state of Arctic human development to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade and based on this assessment to identify policy relevant conclusions and key gaps in knowledge new and emerging Arctic success stories The production of AHDR II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North It addresses critical issues and emerging challenges in Arctic living conditions quality of life in the North global change impacts and adaptation and Indigenous livelihoods The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents quality of life at both the regional and global scales It shows that the Arctic is not a homogenous region Impacts of globalization and environmental change differ within and between regions between Indigenous and non Indigenous northerners between genders and along other axes
