Pre-budget Report 2008 Great Britain. Parliament. House of Commons. Environmental Audit Committee,2009 This report examines firstly the Treasury s response to recession The fiscal stimulus measures intended to pull the economy out of recession represent an invaluable opportunity to transform the UK into a low carbon economy But meeting climate change and renewable energy targets will require a step change in environmental investment This year s Pre Budget Report announced a 535m package of green fiscal stimulus measures designed to tackle economic and environmental problems simultaneously This investment is welcome but the scale too small most of this funding was already committed and will be offset by reduced spending in 2010 11 Extra funding announced for the Warm Front programme will not deliver the scale and speed of change that is needed Programmes aimed at improving the energy efficiency of existing buildings should be the number one priority for green fiscal stimulus It is disappointing that the wider fiscal stimulus package contains hundreds of millions of pounds for road building and widening The Treasury should publish an assessment of the net impacts of its fiscal stimulus package on the environment The second part of the report looks at green taxation In real terms revenue from green taxes has gone down slightly since 1998 while revenue from all taxation has increased by around 30 per cent On aviation taxes the Committee criticise the Treasury s backtracking on replacing Air Passenger Duty with a per plane charge and exhorts the Government to seek reform of the Chicago Convention so as to allow taxation of international aviation fuel On motoring taxes it calls for re examination of the merits and practicalities of a car scrappage scheme to pay people to trade in their existing older cars for newer more efficient models

Corporate Trauma John Oliver,2025-11-03 All too often organizations appoint a new CEO to turnaround their fortunes only to see a familiar pattern of failure repeated with each new strategy Is this simply a case of poor leadership or are there more complex issues at play John Oliver s ground breaking book introduces the provocative concept of Corporate Trauma arguing that conventional turnaround playbooks often miss a critical element the lingering impact of a past corporate crisis Drawing inspiration from the biological field of Epigenetics where an inherited generational trauma results from an environmental stress event Corporate Trauma posits that a significant organizational

shock can result in adaptive and embedded dysfunctional patterns deep within an organization's cultural DNA Through original case studies this book offers a vital new diagnostic lens for leaders and consultants to understand why companies get trapped in a downward spiral of decline identifying the entrenched negative attitudes and behaviors that act as a hidden killer of corporate turnarounds By moving beyond the classic turnaround playbook to identify the root cause of persistent corporate failure Corporate Trauma offers an invaluable path to success that will drive strategic renewal and inject vitality back into any struggling organization

Beyond Stern Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2007-07-30 This report is about how the Government sets targets for reductions in UK green house gases assess progress towards these targets by forecasting the likely levels of future emissions choose policy instruments to deliver the requisite cuts in emissions and revises its package of policies in the light of experience It is two main parts the first looks at the Climate Change Programme Review whilst the second examines the proposed Climate Change Bill The Climate Change Programme Review revealed a

number of weaknesses in the UK climate change policy as it became apparent that the target of a 20% reduction in carbon emissions by 2010 would be missed. Revisions to the projection of emissions had not been done frequently enough so by the time Ministers knew there were problems it was too late to introduce new measures. The programme is however likely to be rescued somewhat by Phase II of the EU Emissions Trading Scheme which promises to deliver some real savings. The draft Climate Change Bill alongside other developments such as the creation of the Office of Climate Change and requirements of the Climate Change and Sustainable Energy Act 2006 are broadly well designed and a far reaching responses to these issues.
