Innovation Policies, Business Creation and Economic Development Neslihan Aydogan,2008-11-13 It is now apparent to many scholars and practitioners that research and development activities and innovation are the pathways to sustainable economic growth One also recognizes that delving into a topic as such is rather challenging as it is a multidimensional task We have learned quite a bit on the innovation growth relationship of the developed countries based on the extensive research on the topic However we are yet to understand the very same process for the developing countries where the challenges are expected to be paramount There obviously is few empirical and theoretical discussion on this topic This book dares to provide a succinct discussion on a wide array of issues on the innovation and growth relationship for the developing countries The book starts off by providing the reader with a promising alternative to endogenous growth models that entails understanding the effect of variables such as technological change on growth in considerable detail The next step in the book involves a thorough analysis of economic growth models and how the investment climate affects innovation and entrepreneurship and hence economic growth Against this background is examined the context of the telecommunications industry in Turkey Following this we delve into understanding the radical versus incremental innovation activities where it is argued that developing nations are more likely to engage in radical innovation whereas developed nations are engaged in incremental innovation

Humanitarian NGOs, (In)Security and Identity Andrea Schneiker, 2016-03-09 Increasingly humanitarian NGOs

operate in the context of armed conflicts where the security risks are higher than in contexts of natural disaster Working in Afghanistan Somalia Sudan South Sudan Pakistan and Sri Lanka is particularly dangerous for humanitarians This existential threat affects the physical existence of aid workers and the implementation of humanitarian programs and the core beliefs of humanitarians and the underlying principles of humanitarian action For NGOs it is difficult to accept that they are attacked despite their good intentions sometimes even by the very communities they seek to help For these reasons humanitarian NGOs have to change their approaches to security by not only adapting their policies procedures and structures to the changing environment but also reviewing the underlying principles of their work This book contributes to debates by demonstrating how issues of in security affect humanitarian NGOs and the humanitarian identity situating the structural changes within the humanitarian NGO community in the context of conflict aid governance and explains how non state actors establish their own governance structures independent from state sponsored solutions and contributes to the emerging literature on the redefinition of the concept of epistemic communities
