The Handbook (The Encheiridion) Epictetus, Nicholas P. White, 1983-01-01 From the Introduction Stoic philosophy of which Epictetus c a d 50 130 is a representative began as a recognizable movement around 300 b c Its founder was Zeno of Cytium not to be confused with Zeno of Elea who discovered the famous paradoxes He was born in Cyprus about 336 b c but all of his philosophical activity took place in Athens For more than 500 years Stoicism was one of the most influential and fruitful philosophical movements in the Graeco Roman world The works of the earlier Stoics survive only in fragmentary quotations from other authors but from the Renaissance until well into the nineteenth century Stoic ethical thought was one of the most important ancient influences on European ethics particularly because of the descriptions of it by Cicero through surviving works by the Stoics Seneca Marcus Aurelius and also Epictetus and also because of the effect that it had had in antiquity and continued to have into the nineteenth century on Christian ethical views Nowadays an undergraduate or graduate student learning about ancient philosophy in a university course may well hear only about Plato and Aristotle along perhaps with the presocratics but in the history of Western thought and education this situation is somewhat atypical and in most periods a comparable student would have learned as much or more about Stoicism as well as two other major ancient philosophical movements Epicureanism and Scepticism In spite of this lack of explicit acquaintance with Stoic philosophers and their works however most students will recognize in Epictetus various ideas that are familiar through their effects on other thinkers notably Spinoza in our intellectual tradition

Encheiridion, Or Manual Epictetus,2020-01-23 The Enchiridion of Epictetus is a short manual of Stoic ethical advice compiled by Arrian a 2nd century disciple of the Greek philosopher Epictetus Common English translations of the title are Manual or Handbook **The Enchiridion of Epictetus** Epictetus,2011-11-11 The Enchiridion Greek for Handbook of Epictetus is a favourite text of the Stoic school of philosophy Compiled by Arrian a former pupil around the time of Epictetus death in 135 AD this enduring text is a compilation of lecture notes based on Epictetus lessons It has long been considered an excellent manual of practical philosophy Epictetus 55 135 AD was born at Hierapolis in what is now Turkey Sold to Epaphroditos who was secretary to Emperor Nero he spent his youth in Rome He developed a consuming passion for philosophy With the permission of his master Epictetus was allowed to study Stoic philosophy Over time as his learning and wisdom grew he became a respectable citizen of Rome and an esteemed philosopher Epictetus unlike some of his metaphysical forebears concentrated on making philosophy practical How it could be used beneficially in everyday life The timeless message of the Enchiridion is as practical today as it was in ancient Greece Perhaps this is where the Enchiridion gets its enduring power and long life A central theme of the work is to clearly distinguish between what we can and cannot control in life We can control what we think and how we act We cannot control what others think and how they act We must put our effort into what we can control and refuse to worry about what we cannot Following on from this is to limit our expectations If we understand we cannot control people then we will not expect them to behave in a certain way and we will not get upset or disappointed when they do something different Another theme is to not become attached to people and things such that when they disappear from our lives we will be upset This idea bears a striking resemblance to the central Buddhist tenet of non attachment to impermanence Epictetus urges us to observe carefully the patterns of Nature and learn to live in harmony with them This includes accepting what happens in life with grace without resistance It is how we think about events that makes them good or bad not the event itself Our beliefs create our reality The same event could be interpreted by two people in diametrically opposed ways according to their belief These have been a sampler of the many
