Most accidents, whether they occur in industry, on the farm, or home or on the highway, are caused by the failure of some individual to follow simple and fundamental safety rules or procedures. For this reason, **AVOID ACCIDENTS** can be **PREVENTED** by recognizing the real causes and being alertening about it before the accident occurs.

Regardless of the care used in the design and construction of any type of equipment there are conditions that cannot be completely safeguarded against without interfering with reasonable accessibility and efficient operation.

A safety device is to be used whenever a hazard exists.
The complete absence of any safety will cause severe injury.
Maintenance must not be performed on any machine.

Never attempt to clean, oil or adjust a machine while it is in motion.

WARNING

On machines having hydraulics, pneumatics, and/or cable controlled stops, never touch hydraulic rudders, valves, controls, etc., or release the equipment's control of the ground before stopping, starting, or after finishing. If it is necessary to leave the hydraulics, pneumatics, and/or cable controlled stops, shut partially or fully closed to get devices in correct state, to sure the equipment is suitably supported by means other than the hydraulics or pneumatics, cable and/or mechanical devices used for controlling the equipment.
