INTRODUCTION

Congratulations on your investment! You are now equipped with the best wireless headset system available for your business needs. The interactive HOME screen provides you with a complete overview of your system at a glance. Innovative smart features enhance ease of use while color-coded indicators provide a quick visual status of a feature or component.

A green indicator means that the feature/component is online, active, and functional. In this example, the Speaker/Microphone is connected and functioning properly.

A red indicator means that the feature/component is offline, inactive, or requires attention. In this example, there are no headsets detected. Turn on a headset and pair one for this indicator to turn green.

A yellow indicator is a transitional state. In this example, the transceiver is scanning for available channels. Once an available channel is found, it turns green (this can take a few minutes).

A gray indicator means that no AC70 Smart Battery Charger is detected. Position the AC70 within 10 feet (3 m) of the base station for this indicator to turn green. Note: the AC70 can function independently (it does not require a base station connection to function).
