Peter Marren,Richard Mabey,2010 As with Flora and Birds Bugs is not a biological guide but a richly illustrated cultural one
seen through the eyes of writers musicians artists and naturalists from the great Tudor naturalist Thomas Muffet father of
Little Miss Muffet to Irvine Welsh s talking tapeworm in Filth as well as contributions by ordinary men and women who are
fascinated by creepy crawlies of all kinds The book is structured along a roughly evolving path from simple cell life forms
amoeba worms crustaceans proof say the authors of just how far you can go on very little to bugs we all might recognise
spiders butterflies bees and back into the water to meet molluscs and almost fish The book works so triumphantly because
author Peter Marren has examined bugs in the dusty corners of our houses and gardens as well as traversing mountains
lakes and fields In addition to the fascinating habits of the bug world he also includes the eccentric behaviour of the bug
obsessives themselves But of course the true heroes of the book are the bugs themselves the nimble dicks clock ladies and
coffin cutters From the Boring Sponge its official name to the Mermaid s Glove and Penis Worm via the glamorous Dark
Crimson Underwing and Ruby Tailed Wasp this rich compendium of bugs is a must not only for naturalists but for anyone
who cares about the crawling buzzing swarms at our feet
