Risk Management within the IT-Service Lifecycle Jan Kussowski, 2015-05-13
Bachelor Thesis from the year 2014 in the subject Computer Science Commercial Information Technology grade 2 0
University of Applied Sciences Brandenburg Fachbereich Wirtschaft language English abstract Risk Management for IT Service Lifecycle Management is not always performed in a transparent repeatable and consistent way In consequence its potential to be used as a key element for successful decision taking is not fully utilized This thesis considers applied standards models and practices in the IT Service Management to establish a methodology which enables improvement of Risk Management within the IT Service Lifecycle The developed methodology determines stages in the Lifecycle where risk assessments should be performed It also defines the required information and their sources Being based on already existing processes within a service providing organization this methodology can easily be applied to improve the service quality Motivation Since one major business sector of Merck is the production of pharmaceutical products the organization is subject to very strict regulations for development and production of their life science products and the business supporting IT Services therefore underlie a strong IT Governance This IT Governance as part of the corporate Governance is highly influential on how IT Services are operated and carried out over their whole lifecycle In addition business processes and the

management of risks are highly important factors The provided IT Services have to be on track with business needs of the respective customers To ensure this alignment strategic decisions need to be based on relevant information To improve this decision making process various types of information on IT Services are needed The author s professional background served as a foundation for addressing this corporate need of Merck Having obtained basic knowledge on IT Services related organizations and processes the author took this opportunity to pursue his growing interest within this field of research

The IT Service Part 2 - The Handbook Pierre Bernard,1970-01-01 Since the early 2000s numerous external scenarios and drivers have added significant pressures upon the IT organisations Among many these include Regulatory compliance data privacy requirements and corporate scandals have focused a requirement for transparency with high impact on IT organisations Economic pressures require IT organisations to more closely align with business imperatives The outcome has been an explosion of standards and frameworks each designed to support the IT organisation as it demonstrates to the world that they are the rock of an organisation strong reliable effective and efficient Most of these standards and frameworks have great elements but no organisation can adopt them all and many were created without sufficient considerations for interoperability The IT Service in 2 parts looks at the key and very simple goals of an IT organisation and clearly and succinctly presents to the reader the best rock solid elements in the Industry It then shows how all the key elements can easily crystallise together with great templates and check lists In Part 1 another book the reader is presented with the simple objectives that the IT department really must address In Part 2 this book the reader gains expert advice on how the components of IT Service are crystallised in a real environment There s a delightfully simple set of steps OVERVIEW OF THE SERVICE DESIGN PACKAGETHE SERVICE STRATEGYASPECTS Of SERVICE DESIGNOUTPUTS OF THE SERVICE DESIGN PHASEOUTPUTS OF THE SERVICE TRANSITION PHASEOUTPUTS OF THE SERVICE OPERATION PHASEWithin these the Author gives a very simple set of templates or tells you where they are to be found practical guidance and very simple checklists It s up the reader how far you develop each stage a lot depends on the nature of your business of course The joy of this approach is that the reader knows that all basic components are identified and that more extensive resources are referred to if the reader wishes to extend Service operation Great Britain.
