Lesson Plans Goals And Objectives Examples:

Goal-Driven Lesson Planning for Teaching English to Speakers of Other Languages Christina Michaud, Marnie Reed, 2010-07-29 This book is more than a collection of activities or ready made lesson plans to add to a teaching repertoire. Instead, Goal Driven Lesson Planning is intended to empower teachers and help them create a principled framework for their teaching. A framework that will shape the varied activities of the ESL classroom into a coherent teaching and learning partnership. After reading this book, teachers and prospective teachers will be able to articulate their individual teaching philosophies. Goal Driven Lesson Planning shows readers how to take any piece from English language materials: an assigned text, a random newspaper article, an ESL activity from a website, etc. and use it to teach students something about language. Readers are walked through the process of reflecting on their role in diagnosing what that something is, what students really need, and planning how to get them there and how to know when they got there in a goal driven, principled manner. This book has chapters on the theory of setting specific language goals for students, how to analyze learner needs including an initial diagnostic and needs analysis templates to use when planning goal driven English language lessons, explicit instruction on giving corrective feedback, how to recognize and assess student progress, and the mechanics and logistics that facilitate the goal driven language classroom.

Course Design for TESOL Florin Mihai, Kerry Purmensity, 2016-03-22 Course Design for TESOL offers a unique approach of integrating curriculum with teaching activities to allow language educators to utilize the text in a variety of courses in a TESOL program. Although the authors assume readers have a basic knowledge of English grammar, this textbook resource is designed to be comprehensible to those who have not had an SLA or Applied Linguistics course. Because each language skill is discussed in detail in terms of important theories and concepts and actual teaching activities are included, the book can also be used in a Methods course or a combined Curriculum Design Methods or Methods and Materials course. Part I explores the basic language acquisition theories and their influences on current teaching practices in the field. Part II then moves on to the core elements of designing a curriculum or course: conducting the needs analysis, setting of course goals/objectives, designing the syllabus, and writing lesson plans. Part III, Instructional Activities and Assessment Techniques, features chapters on the teaching of listening, speaking, reading, writing, grammar, and culture. Within each of these chapters, the authors address the fundamental issues related to the teaching of each skill and then discuss the components of a good activity for that skill and how to design one, and then offer four sample activities, one for each type of syllabus, and guidance on assessing that skill. The activities can be adapted for use in a variety of classrooms and settings. Part IV addresses contemporary trends, curriculum issues in North America and Europe, standards and educational policy, practices in teaching in Asia, particularly China and Korea, and technology enhanced learning.
