**The Math Gene** Keith Devlin, 2001-05-17 Why is math so hard And why despite this difficulty are some people so good at it If there's some inborn capacity for mathematical thinking which there must be otherwise no one could do it why can't we all do it well Keith Devlin has answers to all these difficult questions and in giving them shows us how mathematical ability

evolved why it's a part of language ability and how we can make better use of this innate talent He also offers a breathtakingly new theory of language development that language evolved in two stages and its main purpose was not communication to show that the ability to think mathematically arose out of the same symbol manipulating ability that was so crucial to the emergence of true language Why then can't we do math as well as we can speak The answer says Devlin is that we can and do we just don't recognize when we're using mathematical reasoning **GRE GMAT Math Workbook**, 1997
