

1. Cut To Length

TracPipe® is marked every meter as an installation aid. Use a wheeled tube cutter with a stainless steel blade. Cut through plastic cover & stainless steel pipe ensuring blade is centred between two corrugations. Use full circular strokes in one direction & tighten roller pressure slightly (a quarter turn) after each revolution. Ensure a clean cut with no tags.

2. Strip Cover

Using a utility knife, strip back the plastic cover about 25mm back from the cut end to allow assembly of fittings.

3. Install Back Nut

Slide the back nut over the cut end. Place the two split rings into the first corrugation next to the pipe cut. Slide the back nut forward to trap the rings.

4. Fit Autoflare® Fitting

Place the AutoFlare® fitting into the back nut & engage threads. Note that the AutoFlare® fitting is designed to form a metal-on-metal leak-tight seat on the piping as you tighten the fitting. No paste should be used. Using appropriate wrenches, tighten the fitting until the resistance to wrenching increases greatly. The flare has now been created on the piping end.

5. Final Torque

Tighten nut and body as though you were making up a flared tubing joint. Note the relation between hex flats at this point and continue to tighten for two additional hex flats (one-third turn) to obtain required torque and final leak-tight seal. Ensure no more than two threads are on view when tightened.

6. Tape Wrap

After gas tightness test. Care must be taken after pressure test to ensure that no stainless steel pipe is visible. Any portions of exposed stainless steel behind the fitting nut shall be wrapped with TracPipe® self-bonding silicone tape. This will reduce the possibility of later corrosive attack.

Quick Installation Guide

For perfect, gas tight, metal to metal seal First time, every time.

Gas Installation Guide

Judd E. Hollander

Gas Installation Guide:

Tolley's Industrial and Commercial Gas Installation Practice John Hazlehurst, 2010-08-31 This is the third of three essential reference volumes for those concerned with the installation and servicing of domestic and industrial gas equipment. This volume explains the basic principles underlying the practical and theoretical aspects of installing and servicing gas appliances and associated equipment from the basics of combustion to burners pressure and flow transfer of heat controls as well as materials and processes electrical aspects and metering and measuring devices. Covering both Natural Gas and Liquefied Petroleum Gas the many illustrations and worked examples included throughout the text will help the reader to understand the principles under discussion. Volume 3 of the Gas Service Technology Series will enable the reader to put into practice the safe installation and servicing procedures described in the companion volumes Basic Science and Practice of Gas Service Volume 1 and Domestic Gas Installation Practice Volume 2. Combining a comprehensive reference with practical application in real world engineering contexts Volume 3 provides an essential handbook for all aspects of fundamental gas servicing technology ideal for both students new to the field as well as professionals and non operational professionals e.g. specifiers managers supervisors as an ongoing source of reference.

Tolley's Industrial and Commercial Gas Installation Practice Frank Saxon, 2006 This is the third of three essential reference volumes for those concerned with the installation and servicing of domestic and industrial gas equipment. This volume explains the basic principles underlying the practical and theoretical aspects of installing and servicing gas appliances and associated equipment from the basics of combustion to burners pressure and flow transfer of heat controls as well as materials and processes electrical aspects and metering and measuring devices. Covering both Natural Gas and Liquefied Petroleum Gas the many illustrations and worked examples include

Building Services Handbook Fred Hall, Roger Greeno, 2015-08-14 This eighth edition of Hall and Greeno's leading textbook has been reviewed and updated in relation to the latest building and water regulations new technology and new legislation and even more design calculations have been added. In addition topics such as alternative sources of natural energy solar ground source heat pumps renewable energy sources geothermal methods and wind power are now covered. Building Services Handbook summarises the application of all common elements of building services practice technique and procedure to provide an essential information resource for students as well as practitioners working in building services building management and the facilities administration and maintenance sectors of the construction industry. Information is presented in the highly illustrated and accessible style of the best selling companion title Building Construction Handbook. THE comprehensive reference for all construction and building services students. Building Services Handbook is ideal for a wide range of courses including NVQ and BTEC National through Higher National Certificate and Diploma to Foundation and three year Degree level. The clear illustrations and complementary references to industry Standards combine essential guidance with a resource base for further reading and development of specific topics.

Building Services Handbook Roger Greeno, Fred Hall, 2009-06-04 The Building Services Handbook summarises concisely in diagrams and brief explanations all elements of building services Practice techniques and procedures are clearly defined with supplementary references to regulations and relevant standards This is an essential text for all construction building services students up to undergraduate level and is also a valuable reference text for building service professionals This new book is based on Fred Hall's Essential Building Services and Equipment 2ed and has been thoroughly updated throughout It is a companion volume to the highly popular A Practical Guide to LP-gas Utilization Earle A. Clifford, 1957 *Handbook of Fire & Explosion Protection Engineering Principles for Oil, Gas, Chemical, & Related Facilities* Dennis P. Nolan, 1996-12-31 The security and economic stability of many nations and multinational oil companies are highly dependent on the safe and uninterrupted operation of their oil gas and chemical facilities One of the most critical impacts that can occur to these operations are fires and explosions from accidental or political incidents This publication is intended as a general engineering handbook and reference guideline for those personnel involved with fire and explosion protection aspects of critical hydrocarbon facilities Design guidelines and specifications of major small and independent oil companies as well as information from engineering firms and published industry references have been reviewed to assist in its preparation Some of the latest published practices and research into fire and explosions have also been mentioned
