10 to 25 David Yeager, 2024-08-06 NATIONAL BESTSELLER Acclaimed developmental psychologist David Yeager reveals the new science of motivating young people ages ten through twenty five in this groundbreaking book that is a must read for managers parents educators coaches and mentors everywhere Required reading for anyone who aspires to be a wise influence on the young people they care about Angela Duckworth One of the most fascinating and important books of the past decade It will change millions of lives Carol Dweck This engaging data driven book is filled with practical insights Adam Grant Imagine a world in which Gen Xers millennials and boomers interact with young people in ways that leave them feeling inspired enthusiastic and ready to contribute rather than disengaged outraged or overwhelmed That world may be closer than you think In this book based on cutting edge research psychologist David Yeager explains how to stop fearing young people s brains and hormones and start harnessing them Neuroscientists have discovered that around age ten puberty spurs the brain to crave socially rewarding experiences such as pride admiration and respect and to become highly averse to social pain such as humiliation or shame As a result young people are subtly reading between the lines of everything we say trying to interpret the hidden implications of our words to find out if we are disrespecting or honoring them Surprisingly this sensitivity to status and respect continues into the mid twenties 10 to 25 helps adults develop an ear for the difference between the right and wrong way to respect young people and avoid frustrating patterns of miscommunication and conflict Yeager explains how to adopt what he terms the mentor mindset which is a leadership style that s attuned to young people s need for status and respect Anyone can adopt the mentor mindset by following a few highly effective and easy to learn practices such as validating young people s perspectives rather than dismissing them asking them questions rather than telling them what to do being transparent about your beliefs and goals rather than assuming that they will accurately guess your thoughts and holding them to high standards rather than coddling them Yeager s scientific experiments have shown these practices reduce a wide variety of behavior problems including school dropout unhealthy eating stress purposelessness mental health problems and more One of the biggest misconceptions about mentoring is that it takes up too much time On the contrary those who use the mentor mindset end up with more time Through back and forth conversations young people feel empowered and managers can transfer responsibility to them Young people in this age group are poised to learn grow and accomplish incredible things if only we can tap into the basic neurobiological systems that drive their motivation and behavior An essential read for anyone who interacts with young people 10 to 25 is a groundbreaking book that offers long term strategies to help nurture well adjusted independent accomplished young people who contribute to society in positive ways all while making our own lives easier

[Enterprise Risk Management](#) Mirna Jabbour, Jason Crawford, 2024-12-02 ERM is considered a dynamic capability that is critical to companies success from strategic and performance perspectives and is increasingly implemented in response to growing pressure from external stakeholders to enact and add legitimacy to existing management control systems However implementing ERM is a challenging process where success is dependent on balancing technical and social factors This book explores the challenges

of implementing ERM from technical cognitive and social perspectives to enhance the organisation's capacity to generate and integrate information and knowledge about risk and uncertainty In existing publications ERM implementation is mainly viewed from technical or educational perspectives and treated as formal technical linear processes This book takes a different stance by recognising that implementation depends on formal and informal mechanisms that require a balanced combination of technical and social approaches It changes the paradigm to demonstrate that the implementation of ERM is not a linear process that is similar across industries and organisations but relies on multiple dependencies such as leadership corporate governance and the culture of the organisation This book will be a valuable resource for scholars as well as upper level students across disciplines related to risk management including accounting and finance business and management leadership and organisational studies *Resources in Education* ,1989 Serves as an index to Eric reports microform

Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction **Cumulative Author Index to Psychological Abstracts** ,1975 *Vestibular*

Rehabilitation, Neuromodulation and Balance in Clinical Applications of Neurology and Otoneurology: What is the Recent Evidence from Basic and Clinical Research? Catarina Costa Boffino ,Michael C. Schubert, 2025-05-22 Balance control is a challenging area for neurological and otoneurological patients concerning the understanding of the disease the components involved in the clinical condition adaptation and compensation for the condition as well as the follow up treatment that can be put in place The physiological and functional features of balance control are complex and usually involve more than one

method for specific assessment and for gaining knowledge of the complete case Rehabilitation can help to understand current balance control limitations in patients and is of great interest for the prognosis and possible interventions for the unbalanced and balance condition Vestibular rehabilitation is one of the most appropriate approaches in balance disorders and more recently non invasive neuromodulation is expected to help people with balance control disorders Yet we need to have a clear overview of where in basic concepts and clinical applications we are in this field Our goal with this Research Topic is to bring together the main exponents in the field of balance disorder rehabilitation in order to characterize the historical moments and what evidence is already known in this field as well as what new paths are expected Authors can submit articles in the field of neurology otoneurology psychiatry physical therapy vestibular rehabilitation neuroimaging and invasive and non invasive neuromodulation concerning balance control assessment or therapeutics We look for articles in basic concepts as well as clinical applications
