Life Science Papergrade1 2014 November Scope:

Neuroinflammation and Behaviour Luba Sominsky, Adam K. Walker, Deborah M. Hodgson, 2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication. This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes. In particular, this interaction plays an important role in cognition, mood, and behaviour. Neuroinflammation is known to contribute to neurological and affective disorders, including impaired learning and memory, depressive anxiety, and schizoaffective symptoms, as well as pain. The development of these conditions often occurs on the backdrop of pre-existing physical illnesses, which give rise to increased activation of the immune system, such as cancer, obesity, infection, and autoimmune disorders. Similarly, psychological states can alter the regulation of the immune system. This has been most extensively studied in the context of stress and immune function. Understanding the underlying mechanisms that lead to the onset of inflammation-induced neuropathology and stress-induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects. In this research topic, we explored the relationship between the immune system and the brain throughout life. We include both original research and review papers from animal, clinical, and molecular perspectives. Foundations of Islāmic Psychology G. Hussein Rassool, Mugheera M.

Luqman, 2022-08-19 Foundations of Islāmic Psychology From Classical Scholars to Contemporary Thinkers examines the history of Islāmic psychology from the Islāmic Golden Age through the early 21st century, giving a thorough look into Islāmic psychology's origins, Islāmic philosophy and theology, and key developments in Islāmic psychology. In tracing psychology from its origins in early civilisations, ancient philosophy and religions to the modern discipline of psychology, this book integrates overarching psychological principles and ideas that have shaped the global history of Islāmic psychology. It examines the legacy of psychology from an Islāmic perspective, looking at the contributions of early Islāmic classical scholars and contemporary psychologists, and to introduce how the history of Islāmic philosophy and sciences has contributed to the development of classical and modern Islāmic psychology from its founding to the present. With each chapter covering a key thinker or moment, and also covering the globalisation of psychology, the Islāmisation of knowledge, and the decolonisation of psychology, the work critically evaluates the effects of the globalisation of psychology and its lasting impact on indigenous culture. This book aims to engage and inspire students taking undergraduate and graduate courses on Islāmic psychology to recognise the power of history in the academic studies of Islāmic psychology, to connect history to the present and the future, and to think critically. It is also ideal reading for researchers and those undertaking continuing professional development in Islāmic psychology, psychotherapy, and counselling. PLATE: Product Lifetimes And The Environment Conny A.

Bakker, 2017-11-15 Product lifetimes are critical for the circular economy, resource efficiency, waste reduction, and low carbon strategies for sustainability, and are therefore of interest to academics from many different disciplines, as well as original

equipment manufacturers OEMs and other stakeholders The challenges related to product lifetimes must be tackled from multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft the Netherlands in November 2017 The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other s knowledge and further advance the field The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes design for product longevity product lifetime optimization cultural perspectives on the throwaway society circular economy and product lifetimes business opportunities economic implications and marketing strategies consumer influences on product lifetimes and policy regulation and legislation The book will be of interest to all those concerned with sustainable consumption circular economy and resource efficiency
