STEM for humanities scholars Walter Hehl, 2025-08-25 The beginnings of natural sciences and humanities in antiquity were shared but by the end of the 19th century the natural sciences had developed dominantly through their successes In response to this dominance the philosopher Wilhelm Dilthey coined the term Geisteswissenschaften humanities in 1883 On the other hand it was clear in the natural sciences that entire areas of the mind were inaccessible to them such as sensory experiences and consciousness This book attempts to show that this sharp divide has softened Physics has become more intellectual and the technology of the mind has developed fundamentally this is information technology Physics for the inanimate and computer science with a physical basis for all living things and for the computer together explain the world With mathematics as its foundation and tool this results in STEM MINT in German Mathematik Informatik Naturwissenschaft Technik An intellectual worldview without STEM is not possible with dignity There are several STEM fields that are directly useful to the humanities Examples include the principle of the laser and the concept of entropy A third intellectual domain remains outside art But art and STEM are not opposites
