Developing Narrative Comprehension Ute Bohnacker, Natalia Gagarina, 2020-12-15 Comprehension of texts and understanding of questions is a cornerstone of successful human communication Whilst reading comprehension has been thoroughly investigated in the last decade there is surprisingly little research on children s comprehension of picture stories particularly for bilinguals This can be partially explained by the lack of cross culturally robust cross linguistic instruments targeting early narration This book presents an inference based model of narrative comprehension and a tool that grew out of a large scale European project on multilingualism Covering a range of language settings the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills bilingual children can be expected to master at a certain age and explores how such comprehension is affected or not affected by linguistic and extra linguistic factors Linking theory to method the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative multilingualism and language acquisition

Assessing Multilingual Children Sharon Armon-Lotem, Jan de Jong, Natalia Meir, 2015-04-28 Second language learners often produce language forms resembling those of children with Specific Language Impairment SLI At present professionals working in language assessment and education have only limited diagnostic instruments to distinguish language impaired migrant children from those who will eventually catch up with their monolingual peers This book presents a comprehensive set of tools for assessing the linguistic abilities of bilingual children It aims to disentangle effects of bilingualism from those of SLI making use of both models of bilingualism and models of language impairment The book s methods oriented focus will make it an essential handbook for practitioners who look for measures which could be adapted to a variety of languages in diverse communities as well as academic researchers

Remote Online Language Assessment: Eliciting Discourse from Children and Adults Natalia Gagarina, Angel Chan, Wenchun Yang, 2024-08-20 Being able to collect valid data is crucial for empirical science disciplines such as linguistics developmental psycholinguistics clinical psycholinguistics and speech and hearing sciences In recent years there has been an increasing use of digital devices for remote language assessments such as online elicitation of language samples apps for eliciting expressive and productive lexical abilities and
