classical liberalism as expressed in the medical profession and reveals the role abortion plays in each. She shows why in each case ideas about abortion are unlikely to change because they emerge from each community's deeply held values and concerns which vary from community to community. She demonstrates that constructing the abortion debate as a choice between pro life and pro choice has distorted and misrepresented the ways that many people relate to the issue of abortion and has obscured the diversity of belief both among and within communities and individuals. Finally she offers a provocative alternative that would allow every community involved to more freely develop and express its views about the morality of abortion.
