

**Study Guide
for the
National Telemetry Association's
Telemetry Certification**

4th Edition

Revised 2024

Disclaimer: The intent of this book is for educational purposes only. ECG interpretation, as well as analysis, with many subtle variations, and can be difficult or misleading to interpret. Not all proper analysis requires much specialized training and experience. Most non-medical practitioners and even some MDs, use the 12-lead technology, 60% of hours, for repetitive diagnostic interpretations of abnormal ECGs and often, are unable to detect other abnormal situations. Most, if not all, ECGs that are run on students in a classroom setting or by persons in their offices will not "test" or "interpret" if an individual is not a physician or an ECG not happens. It is meant to help those of us, without the permit, should see a physician and have another ECG run under proper clinical or hospital diagnostic conditions and that is always the best way to get a ECG report done.
