Earth Science

EARTH'S ORIGIN...94 of 635

How do scientists believe the Earth formed?

**Sample
Flash Card**

Answer 94 of 635

An exploding sun or solar nebula provided the hot gases that formed the Earth. Its layers formed quickly as the gases condensed to liquid, because of density variations. As the iron moved to the center of the proto-Earth, water was driven to the surface. The oxygen for the atmosphere came indirectly from the water.

Ged Earth Science Study Guide
