Manipulative Tenants Einat Zchori-Fein, Kostas Bourtzis, 2011-07-06 In the English edition of his landmark book *Endosymbiosis of Animals with Plant Microorganisms* 1965 Professor Paul Buchner probably the most prominent founder of systematic symbiosis research wrote I too soon fell victim to the spell of this subject and from 1911 on devoted myself to it Almost half a century later a growing number of entomologists are recognizing the impact that arthropod bacteria symbiosis has on virtually all aspects of the biology of both host and symbiont The discussion of this subject tends to be system based with primary emphasis on the insect host However recent screening studies have revealed that the diversity of bacteria associated with arthropods may not be as wide as initially expected and some genera are constantly being found in hosts that belong to distantly related taxa

Manipulative Tenants Bacteria Associated with Arthropods introduces the fascinating world of bacteria arthropod associations with an emphasis on the bacterial partner Written by an interdisciplinary team of international contributors this book provides an overview of the diversity of bacterial symbionts identified to date as frequent partners of terrestrial arthropods It discusses primary obligatory symbionts as well as the most abundant secondary facultative symbionts currently known Summarizing the most up to date information available on each symbiont the book presents a synopsis of the field from the bacterial angle Chapters examine Proteobacteria including *Sodalis* and *Wigglesworthia* in tsetse flies and *Stammerula* and other symbiotic bacteria in fruit flies as well as Bacteroidetes such as *Blattabacterium* and *Cardinium* The book also identifies questions that emerge from the study of these systems This comprehensive reference introduces the topic of bacteria arthropod associations to researchers who are not familiar with it enlarges the scope of knowledge of those who are and provides a textbook for students in microbiology and other branches of biology
