System-Level Synthesis Ahmed Amine Jerraya,Jean Mermet,2012-12-06 System Level Synthesis deals with the concurrent design of electronic applications including both hardware and software The issue has become the bottleneck in the design of electronic systems including both hardware and software in several major industrial fields including telecommunications automotive and aerospace engineering The major difficulty with the subject is that it demands contributions from several research fields including system specification system architecture hardware design and software design Most existing book cover well only a few aspects of system level synthesis The present volume presents a comprehensive discussion of all the aspects of system level synthesis Each topic is covered by a contribution written by an international authority on the subject **Micro-programming** Norman E. Rammig,Hartmut Schmeck,2008-07-09 Look deep into nature and you will understand everything better advised Albert Einstein In recent years the research communities in Computer Science Engineering and other disciplines have taken this message to heart and a relatively new field of biologically inspired computing has been born Inspiration is being drawn from nature from the behaviors of colonies of ants of swarms of bees and even the human body This new paradigm in computing takes many simple autonomous objects or

agents and lets them jointly perform a complex task without having the need for centralized control In this paradigm these simple objects interact locally with their environment using simple rules Applications include optimization algorithms communications networks scheduling and decision making supply chain management and robotics to name just a few There are many disciplines involved in making such systems work from artificial intelligence to energy aware systems Often these disciplines have their own field of focus have their own conferences or only deal with specialized s problems e g swarm intelligence biologically inspired computation sensor networks The Second IFIP Conference on Biologically Inspired Collaborative Computing aims to bridge this separation of the scientific community and bring together researchers in the fields of Organic Computing Autonomic Computing Self Organizing Systems Pervasive Computing and related areas We are very pleased to have two very important keynote presentations Swarm Robotics The Coordination of Robots via Swarm Intelligence Principles by Marco Dorigo Universit Libre de Bruxelles Belgium of which an abstract is included in this volume
