Phytomicrobiome and Stress Regulation Azam Khan, Ken D. Mix, Noshin Ilyas, Riyaz Sayyed, 2025-08-01
Phytomicrobiome and Stress Regulation a volume in the Microbiome Research in Plants and Soil series provides an in depth examination of how plant associated microbial communities mitigate various stresses The book explores the complexities of abiotic and biotic stresses faced by plants emphasizing the importance of the phytobiome in stress alleviation This comprehensive overview sheds light on the significant role that microbial composition and diversity play in driving ecological functions and enhancing plant resilience In addition to addressing stress mitigation the book highlights advances in applied crop microbiology and the dynamic responses of microbial communities to environmental changes It underscores the impact of these communities on soil functioning and ecosystem health making it a critical resource for understanding future climate change scenarios and their implications for plant health Through detailed studies and evidence based insights the book aims to foster a more complete understanding of the intricate relationship between plants and their microbial allies Highlights current research into the resilience of phytomicrobiomes to biotic and abiotic stresses and the related benefit to plants Explains the benefits to agricultural productivity by improving soil structure increasing ecosystem nutrient availability and developing new intervention for insect pests Presents the dynamisms of below and above ground microbiome in stress mitigation *Life Science, Grades 6-7* Tony Wright, 1994-07-13 [Instant Insights: Crop biofortification](#) Dr Helena Pachón, Eliab Simpungwe, Bodo Raatz, Elizabeth Parkes, Olufemi Aina, 2021-04-13 The first chapter reviews evidence of the human health impact of wheat flour fortification and how it is measured and studied The chapter explores the benefits to wheat flour fortification citing the process s ability to address widespread health problems caused by nutrient deficiencies such as iron deficiency and anaemia The second chapter examines the biofortification of maize with Provitamin A carotenoids and its potential in improving micronutrient intake for the population of food insecure people The chapter refers to the Zambia maize biofortification programme as a case study to demonstrate this The third chapter similarly considers the rising threat of micronutrient malnutrition but highlights the integral role biofortified legume crops have in offsetting this The chapter reviews the genetic variability of iron and zinc content in many legume crops and shows how this is being used to guide breeding efforts through both transgenic approaches and agronomic management The final chapter assesses the problem of vitamin A deficiency in countries where cassava is considered a key crop and consumed as a main food source

The chapter reviews the HarvestPlus breeding programme for increasing the nutrient density of cassava as well as strategies that can be implemented to promote the use of pro vitamin A varieties by farmers and consumers

Broadening the Genetic Base of Grain Cereals Mohar Singh, Sandeep Kumar, 2016-09-13 This book offers comprehensive coverage of important grain cereals including their origin and distribution crop gene pool level of diversity production constraints traits of importance for genetic base widening crop improvement methodologies genome mapping genomics for breeding and future strategies The chapters contributed by eminent crop researchers from around the world provide rare insights into the crop specific constraints and prospects drawing from their substantial experience As such the book offers an essential source of information for grain cereals scientists teachers students policy planners and developmental experts alike Grain cereals which comprise rice wheat maize barley oats sorghum and millets are members of the grass family These crops are vital to human nutrition thanks to their roles as staple food crops in different parts of the globe Some of them are rich sources of carbohydrates which provide energy while others are important sources of minerals vitamins and proteins in addition to their medicinal properties In most cereals the existing variability among elite germplasm has been exploited to attain a desirable level of productivity However to make further breakthroughs in enhancing yield and improving stability in future crop cultivars new sources of genes alleles need to be identified in wild weedy species and incorporated into the cultivated varieties Though there have been many publications on various aspects of grain cereal improvement in the recent past to date this essential information has remained scattered among different periodicals
