External Relations Dept.,2017-06-01 This paper focuses on millennials who are increasingly looking to find their way in the sharing economy a phenomenon made possible by the emergence of digital platforms that facilitate the matching of buyer and seller Jobs in the sharing economy like driving for Uber or Lyft help some millennials make ends meet even if such temporary gigs are a far cry from the fulltime jobs with traditional pension plans and other benefits their parents often enjoyed This generation also enthusiastically embraces the services of the sharing economy which provides access to everything from beds to cars to boats without the hassle of ownership Loath to buy big ticket items such as cars and houses millennials have sharply different spending habits from those of preceding generations Millennials confront obstacles to prosperity that their parents didn't face They are better educated than previous generations but in today's world that is not enough to guarantee financial success **Finance and Development, June 2014** International Monetary Fund. External Relations Dept.,2014-05-27 This chapter highlights various ways Asia's growth has affected the world economy The chapter also shows that if currency trends continue the Asian economy is expected to be larger than that of the United States and Europe combined Some Asian countries offer sophisticated financial markets and are centers for technological innovation while others are largely agricultural The study shows that the region is home to 700 million poor people about 65 percent of the world's poor a figure that stands in stark relief against Asia's economic strength and growing prosperity The chapter also references the inquiry by the managing editor of the Journal of Economic Perspectives into the rich and sometimes tortured relationship between economics and virtue **Finance and Development, June 2016** International Monetary Fund. External Relations Dept.,2016-05-31 This article profiles iconoclastic economist Dani Rodrik the Harvard professor whose warnings about the downsides of globalization proved prescient Rodrik has spent most of his professional life at Ivy League institutions He has a bachelor's degree from Harvard and master's and PhD degrees from Princeton followed by a teaching career at Harvard and Columbia Rodrik's warnings that the benefits of free trade were more apparent to economists than to others were prescient His skepticism about the benefits of unfettered flows of capital across national boundaries is now conventional wisdom His successful attack on the so-called Washington Consensus of policies to generate economic growth has made governments and international organizations like the IMF and the World Bank admit that there are many policy recipes that can generate growth Rodrik's caution about financial globalization is now widely shared including at the IMF **Finance & Development, June 2015** International Monetary Fund. Communications Department,2015-06-04 Finance and Development June 2015 *Finance & Development, June 2019* International Monetary Fund. Communications Department,2019-05-30 This issue of Finance Development presents success and works of IMF in the past 75 years since its formation The IMF's

financial firepower must be increased substantially particularly in a world of relatively free capital flows If the world of cooperative globalization is to survive and the IMF is to maintain its role within it a great deal must change Some of these changes are within the IMF s control The most important challenges for the IMF of tomorrow are however those created by the changing world Global cooperation is needed to reap the benefits and avoid the pitfalls of cross border capital flows Cross border capital flows are neither an unmitigated blessing nor an undoubted curse Used judiciously they can be beneficial to recipient countries making up deficiencies in the availability of long term risk capital and reducing gaps in local corporate governance Many emerging market economies have understood that they should build foreign exchange reserves The IMF model suggests that fluctuations in the exchange rate are the main reason for fluctuations in corporate liquidity in receiving countries

Finance & Development, June 1965 International Monetary Fund. External Relations Dept.,1965-06-01 This paper analyzes the effect of rapid inflation on a country s international position The paper highlights that when prices and costs in any country rise rapidly goods produced in the country soon become more expensive than similar goods produced abroad Unless the exchange rate changes this encourages imports and discourages exports As prices in a country rise more rapidly than in the rest of the world individuals in that country tend to turn from buying these increasingly expensive products of their own industries to the relatively cheaper foreign goods
