

CH8 - Flowcharting Problems, Processes, and Process Flows

Monday, February 6, 2023

11:13 AM

Resolving real-world issues requires a deep understanding of the processes, assets, and external forces involved in a company's sales so that you can diagnose the factors that led to the decline in sales as well as identify factors that could lead to a sales resurgence.

- Sales shortfall dilemmas present an infinite "solution space"
- Solution Space - all possible considerations that must be made while determining the solution to a problem
- Complex problems can be simplified by narrowing the solution space
- This is done by making elements of the problem more concrete and less abstract
- This can be accomplished through mapping out processes that lead to relevant outcomes

Flowcharts:

- A flowchart is a diagram that maps out steps taken in executing a process
- Flowcharts allow us a way to break down a process into its component parts, including actions, inputs, outputs, and decision-points.
- Flowcharts are generally used in 2 scenarios:
 1. Process improvement
 2. Designing new processes
