

## Overview

The **Laboratory Virtual Instrument Engineering Workbench (LabVIEW)** is a development environment designed by National Instruments that creates graphic-based programs called virtual instruments (VIs) that simulate actual laboratory instruments. A VI consists of two parts: a front panel and a back panel (Figure 1). The **front panel** allows the user to interact with the VI by displaying outputs and allowing the user to supply the program with inputs. The **back panel** consists of the code used by the VI to obtain inputs from the front panel, operate on the inputs, and display the results.

Figure 1: Front Panel (Left) and Back Panel (Right)

The front panel is built using controls and indicators. **Controls** are inputs that allow a user to supply information to the VI. **Indicators** are outputs that display the results based on the inputs given to the VI. Controls can be switches, knobs, dials, and buttons. Indicators can be meters, gauges, LEDs, and displays. These are located on the Controls palette and are placed on the front panel (Figure 2).
