- c. Explain the importance of studying human growth and development.

### **DEFINITION OF TERMS**

#### **Development**

It is a progressive series of qualitative changes that occur in a predictable pattern as a result of the interaction between biological and environmental factors. It is a unique kind of change that is cumulative and occurs over time in a social context. For example language use, thought processing, reading skills, and peer relationships.

#### **Growth**

This is a progressive series of quantitative changes that occur in a lifespan of a human being. It runs parallel to human development. Examples of these quantitative changes include the physical change in weight and height. Thus these quantitative changes are measurable and observable (physical) during from infancy through to death.

#### **Human Development**

This is a branch of knowledge concerned with the nature and regulation of significant structural, functional and behavioural changes occurring in human as they develop in age and maturity. Structural growth refers to changes for instance in shape and size.

Functional changes relate to the ability of the various organs of the body for instance in regard to the speed of reaction, breathing, reading etc.

Behavioural changes refers to the function manifestation in behaviour for instance when we think before acting.
