Materials

Class

Procedure

Obtain the phenotypic characteristics and the corresponding gene genotypes for the traits listed below:

- In the first row determine Table 1, list the 27 traits/characteristics. Then make sure that the dominant phenotype and the recessive phenotype. Use the examples in the table for correct labeling.
- In the corresponding of Table 1, write your phenotypes and determine its dominance or recessive.
- In the third column of Table 1, write your corresponding trait gene genotypes.

Questions

- If you show the recessive trait, then you must be homozygous recessive.
- If you show dominant trait, you may be heterozygous/dominant (dominant) or homozygous for that trait.
 - If one of your parents shows the recessive trait, then you must have passed on a gene for the recessive trait, and you must be heterozygous for that trait.
 - If neither of your parents shows the recessive trait, you may not know if you are heterozygous or homozygous dominant for that trait. In that case, you **may** provide genotypes (heterozygous and homozygous dominant).

*** If you need help, you may ask your parents about their traits. * Do not write your parents' traits! **

*** If you can't get yourself into mother/father gene parents, please give **your** possible genotypes for dominant/dominant gene.
