Programmable Logic Controllers James A. Rehg, Glenn J. Sartori, 2009 This outstanding book for programmable logic controllers focuses on the theory and operation of PLC systems with an emphasis on program analysis and development The book is written in easy to read and understandable language with many crisp illustrations and many practical examples It describes the PLC instructions for the Allen Bradley PLC 5 SLC 500 and Logix processors with an emphasis on the SLC 500 system using numerous figures tables and example problems New to this edition are two column and four color interior design that improves readability and figure placement and all the chapter questions and problems are listed in one convenient location in Appendix D with page locations for all chapter references in the questions and problems This book describes the technology so that readers can learn PLCs with no previous experience in PLCs or discrete and analog system control *CEP Software Directory*, 1997 **Plant & Control Engineering**, 2003 **Industrial Automation**

Technologies Chanchal Dey, Sunit Kumar Sen, 2020-05-28 The book begins with an overview of automation history and followed by chapters on PLC DCS and SCADA describing how such technologies have become synonymous in process instrumentation and control The book then introduces the niche of Fieldbuses in process industries It then goes on to discuss wireless communication in the automation sector and its applications in the industrial arena The book also discusses the all pervading IoT and its industrial cousin IIoT which is finding increasing applications in process automation and control domain The last chapter introduces OPC technology which has strongly emerged as a defacto standard for interoperable data exchange between multi vendor software applications and bridges the divide between heterogeneous automation worlds in a very effective way Key features Presents an overall industrial automation scenario as it evolved over the years Discusses the already established PLC DCS and SCADA in a thorough and lucid manner and their recent advancements Provides an insight into today's industrial automation field Reviews Fieldbus communication and WSNs in the context of industrial communication Explores IIoT in process automation and control fields Introduces OPC which has already carved out a niche among industrial communication technologies with its seamless connectivity in a heterogeneous automation world Dr Chanchal Dey is Associate Professor in the Department of Applied Physics Instrumentation Engineering Section University of Calcutta He is a reviewer of IEEE Elsevier Springer Acta Press Sage and Taylor Francis Publishers He has more than 80 papers in international journals and conference publications His research interests include intelligent process control using conventional fuzzy and neuro fuzzy techniques Dr Sunit Kumar Sen is an ex professor Department of Applied Physics Instrumentation Engineering Section University of Calcutta He was a coordinator of two projects sponsored by AICTE and UGC Government of India He has published around 70 papers in international and national journals and conferences and has published three books the last one was published by CRC Press in 2014 He is a reviewer of Measurement Elsevier His field of interest is new designs of ADCs and DACs **Design News**, 2002 **Proceedings of the International Topical**
