Books in Print Supplement, 2002 Society and Economics in Europe Savvas Katsikides, Hardy Hanappi, 2016-06-23

This book takes stock of the lessons to be learned from the experiences of different countries on their way to a transition into a unified Europe It demonstrates how the project of a unified Europe is a social pilot project that is unique in human history both with respect to the sheer number of people involved and with respect to the cultural diversity it aims to turn into a progressive advantage With no historical experience at hand the transition into a unified Europe is an exploratory process often risky but sometimes also surprisingly successful To improve the chances of establishing a successful unification it is particularly important that we learn from the mistakes made so far and that we learn rapidly since the forces working against the pilot project of Europe will gain power very fast if the unification success slows down And as the recent developments in Greece show the vision of the final goal itself can well change during this exciting quest Apart from providing the pieces of a mosaic on which a more general theory can be built this book can be read as a collection of experiences mistakes as well as triumphs which should help the European learning process The structure of the book mirrors Europe's diversity specific country studies are combined with more general chapters and quantitatively oriented econometric work is combined with qualitatively oriented sociological studies *International Management in Service Firms* Dirk Klimkeit, Pengji Wang, Huiping

Zhang,2024-05-22 This textbook examines how service firms manage their international operations For the first time it brings together insights from the fragmented literature on this subject into an accessible textbook Further it is unique in its focus on service firms internationalization and international management Beginning with an overview of the international environment in which service firms operate it subsequently describes multinational service firms and their internationalization processes strategies and organization Unlike most texts on international services the book goes beyond internationalization to address the ongoing management of service firms It not only addresses functions such as global service marketing financial management and human resource management but also discusses aspects such as global account management global service delivery and international project management as well as the topical issue of managing distributed virtual teams A dedicated chapter focuses on offshore shared services and business process outsourcing These chapters are complemented by a discussion on international corporate governance and corporate social responsibility The book is intended for students preparing for international careers in the service sector Each chapter includes case studies illustrations highlighted definitions a chapter summary and exercises
