The Library Mystery

Every Thursday, Kayla visited the school library to check out a new mystery book. One afternoon, she noticed something strange: a stack of returned books kept disappearing before the librarian could shelve them.

Curious, Kayla began tracking who came in and when. By the next day, she spotted a pattern. Someone always entered right before the books vanished.

That afternoon, she hurried in just in time to see Mr. Thompson, the art teacher, slipping a few mystery books under his arm. "They're for my mystery-themed art project," he said. Kayla smiled. Case closed.

Amplifying the Curriculum Aída Walqui, George C. Bunch, Peggy Mueller, 2025. Expanded and revised to include four entirely new chapters, this thoroughly updated edition presents a model for how educators can design high-quality, challenging, and supportive learning opportunities for multilingual learners. Starting with the premise that conceptual, analytic, and language practices develop simultaneously as students engage in disciplinary learning, the authors argue for instruction that amplifies rather than simplifies expectations, concepts, texts, and learning tasks. They offer clear guidance for designing well-supported lessons with examples that demonstrate the approach in elementary and secondary classrooms across various subject areas: math, science, language arts, and social studies, and contexts including newcomer classrooms and a new chapter written in Spanish on instruction in students' home languages. This popular resource guides teachers through the coherent design of tasks, lessons, and units that invite all students to engage in productive, meaningful, dialogic, and intellectually engaging activity. The book concludes with a discussion of where teachers might begin and how teacher

educators professional development providers and educational leaders can support them in these efforts
