Collecting for the Curriculum

Amy J. Catalano, 2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special

needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials

Talking, Drawing, Writing Martha Horn, Mary Giacobbe, 2023-10-10 In the early grades talking and drawing can provide children with a natural pathway to writing yet these components are often overlooked In Talking Drawing Writing Lessons for Our Youngest Writers authors Martha Horn and Mary Ellen Giacobbe invite readers to join them in classrooms where they listen watch and talk with children then use what they learn to create lessons designed to meet children where they are and lead them into the world of writing The authors make a case for a broader definition of writing advocating for formal storytelling sessions in which children tell about what they know and for focused sketching sessions so that budding writers learn how to observe more carefully The book s lessons are organized by topic and include oral storytelling drawing writing words assessment introducing booklets and moving writers forward Based on the authors work in urban kindergarten and first grade classes the essence and structure of many of the lessons lend themselves to adaptation through fifth grade The lessons follow a consistent format What s going on in the classroom What do children need to learn next Materials needed to teach the lesson Language used in each lesson Reasons behind why certain books are chosen and suggestions for additional children s books The authors show the thinking behind their teaching decisions and provide a way to look at and assess children s writing giving us much more than a book of lessons they present a vision of what beginning writing can look and sound like Perhaps most powerfully they give us examples of the language they use with children that reveal a genuine respect for and trust in children as learners

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve

ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like $5 + 7 = 12$ $17 - 8 = 9$ $6 \times 7 = 42$ and $56 \div 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

Envision Math 2009 National Home School Bundle Kit Grade 1, 2008-01-01 Engage Every Learner with enVisionMATH Grade 1 is the next step in advancing your child s math education At this stage you should be developing lesson plans that lay the foundation for your child s future learning and enVisionMATH Grade 1 will help you do so Filled with hands on activities interactive lesson ideas and visual aids this curriculum for homeschooling will keep your child interested as he or she learns Grade 1 picks up right where the Kindergarten material ends giving you and your child a seamless transition into the next phase of his or her education Your child will love the bright colors used in the enVisionMATH materials and you ll enjoy how comprehensive and supportive the system is In fact enVisionMATH Grade 1 comes with a workbook that includes engaging math activities a CD that provides game style math quizzes and a CD designed to help you the teacher With all these great materials you re sure to help your child achieve a strong math foundation by the completion of the 12 week series When your child finishes enVisionMATH Grade 1 he or she should be able to Count to 100 using intervals of one five and 10 Break up numbers using intervals i e $15 = 10 + 5$ Add and subtract using numbers one through 20 Use objects and drawings to express math concepts such as addition and subtraction Recognize patterns and shapes Draw 2 D shapes Measure objects using units of measurement enVisionMATH Grade 1 is structured intelligently so your child feels like he or she is working on math and subject goals rather than tackling random questions Between the interactive problems the dynamic lessons you design using enVisionMATH and the colorful image guides your child is sure to develop a strong foundation in math For more information about the components included in enVisionMATH Grade 1 take a look at the Features and Benefits page

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself

Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily *Resources in Education* ,1982 **Spark Your Child's Success in Math and Science** Jacqueline Barber,Nicole Parizeau, Lincoln Bergman,2002 This accessible and practical sourcebook is for parents who want to understand and contribute to their children s success in math and science and to their overall education 25 illustrations **Bulletin** ,1991
