Alerton® Envision for BACtalk is powerful operator workstation software for BACnet systems. Use it to manage and control building equipment with unprecedented flexibility and power. Envision for BACtalk communicates with BACnet-compliant devices over an Ethernet LAN or through point-to-point (PTP) serial or modem connections.

Three-dimensional animation and full-color graphics enable access to real-time data and energy management features with simple point-and-click control. As-built drawings, floor plans and specific graphics of HVAC equipment are customized for each site. Import images from CAD programs or virtually any graphics program.

In a multi-building campus, a BACnet Ethernet LAN or IP network can interconnect buildings. For large corporations with dispersed holdings, Envision for BACtalk supports BACnet/IP for building integration across the Internet and wide area networks (WANs). Envision for BACtalk can also connect to remote sites via modem or be installed on a laptop computer for direct system access.

SQL Server support enables users to migrate jobs from a conventional server database to an Enterprise server database, improving system performance and providing better access to data. The Job Merge function saves time on bigger job sites by making it easier to add and move graphics. Flexible Users and Groups functionality enables device-level privileges and streamlines setup.

These flexible, integrated control options—and many more featured in Envision for BACtalk—save countless hours and resources. Engineers and technicians can control any building from a single, central operator terminal, and have any number of options for roaming system access.
