Terry Nation was the inventor of the Daleks and wrote other serials for Doctor Who; he also wrote the BBC's 1970s post-apocalyptic drama *Survivors* and created the space adventure series *Blake's 7*. Previously, television science fiction in Britain has received little critical attention. This book fills that gap and places Nation's work in the context of its production. Using Terry Nation's science fiction work as a case study, the boundaries around the authorship and authority of the television writer are explored in detail. The authors make use of BBC's archival research and specially conducted interviews with television producers and other production staff to discuss how the programmes that Terry Nation created and wrote were commissioned, produced, and brought to the screen. The book makes an important contribution to the study of British television history and will be of interest to enthusiasts of Terry Nation's landmark drama series as well as students of Television Studies. **Books Added** Chicago Public Library, 1916 **The Doctor Who Error Finder** R.H. Langley, 2005-08-04 This collection of errors appearing in Doctor Who from every episode of the original television series, the movies, and the spin-offs. Presenting over 4,000 errors plus about 1,500 other items of interest, it includes transmitted bloopers such as microphones or equipment visible in a shot, obvious strings, anachronisms, unsteady sets, and actors having trouble walking.
