Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities Yap, Kevin, Ali, Eskinder Eshetu, Chew, Lita, 2020-07-31 Medication management is an essential component of therapeutic success in the treatment of chronic diseases. However, patients who do not regularly take their prescribed medications are a primary concern of health systems worldwide. A significant proportion of patients on chronic medications fail to adhere to their treatments, and suboptimal adherence leads to dire clinical and financial consequences on the personal level. Moreover, non-adherence can adversely impact public healthcare costs and the clinical outcomes of patients. *Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities* is a collection of innovative research that combines theory and practice on optimizing strategies to improve medication adherence and overall health and wellbeing in patients through the design of usable and reliable mobile app-based systems. Highlighting a broad range of topics including pharmaceutical care, quality assessment, and health behavior frameworks, this book is ideally designed for clinicians, pharmacists, healthcare providers, programmers, software developers, researchers, academicians, and students.

GeoComputation and Public Health Gouri Sankar Bhunia, Pravat Kumar Shit, 2021-06-24 *GeoComputation and Public Health* is fundamentally a multi-disciplinary book which presents an overview and case studies to exemplify numerous methods and solicitations in addressing vector-borne diseases, e.g., Visceral leishmaniasis, Malaria, Filariasis. This book includes a practical coverage of the use of spatial analysis techniques in vector-borne disease using open-source software solutions. Environmental factors, relief, characters, climatology, ecology, vegetation, water bodies, etc., and socio-economic issues, housing type, pattern, education level, economic status, income level, domestic animals, census data, etc., are investigated at micro-level and large scale in addressing the various vector-borne diseases. This book will also generate a framework for interdisciplinary discussion, latest innovations, and discoveries on public health. The first section of the book highlights the basic and principal aspects of advanced computational practices. Other sections of the book contain geo-simulation, agent-based modeling, spatio-temporal analysis, geospatial data mining, various geocomputational applications, accuracy, and uncertainty of geospatial models, applications in environmental, ecological, and biological modeling, and analysis in public health research. This book will be useful to the postgraduate students of geography, remote sensing, ecology, environmental sciences, and research scholars, along with health professionals looking to solve grand challenges and management on public health.
