

OPERATING YOUR TRACTOR

Illustr. 26

Setting the control valve pin for double action (Hydra-Touch triple valve system shown).

Control Handles

Your tractor may be equipped with a single, double, or triple valve Hydra-Touch system. A separate control handle is used to operate each valve.

These control handles (Illustr. 28) are provided to give the operator complete, instantaneous, and effortless control of all implements. The control handles on the double or triple valve system can be used separately or all at the same time. The use of these handles and the choice of single action or double action of the cylinders will depend on the type of implement used with the tractor.

Complete instructions for operating the control handles and use of the cylinders are included in the Operator's Manual furnished with the implement.

General instructions for operating these handles and connecting the hoses are given below. For additional instructions, see "Hydra-Touch System" on pages 78 and 79. For lubrication of these handles, see the "Lubrication Guide" on pages 36 and 37.

Connecting Hoses to Junction Ports and Cylinders

At each junction block on the tractor, there are two self-sealing, external threaded (male) coupling halves. On each coupling hose there is a coupling half with an internal threaded out (female) connection. To prevent error when connecting the hoses

to the junction block ports, the junction block is coded with an arrow pointing to the upper junction ports of the right, left and rear junction blocks. The junction port with the arrow pointing to it should be connected to the cylinder port with the arrow pointing to it. This will assure that the cylinder piston rod will extend when the handles are moved forward and retract when the handles are moved rearward. It will operate in the reverse manner if the hoses are reversed.

Attach the cylinders to the implements.

There are two junction ports, "A" (coded with an arrow on the junction block) and "B," on the rear of a tractor with a single valve system, for attaching the hoses for rear tractor-mounted or trailing-type implements. See Illustr. 26A.

Illustr. 26A

Rear of tractor showing junction ports.

There are four junction ports (two on the rear and two, "C" (coded with an arrow on the junction block) and "D" on the right) on a tractor with a double valve system, for attaching hoses to a rear tractor-mounted, trailing-type, and front tractor-mounted implements. See Illustrations 26A and 26B.

Illustr. 26B

Right side of tractor showing junction ports.

Farmall 450 Operator Manual

M Walker

Farmall 450 Operator Manual:

Eventually, you will unquestionably discover a other experience and capability by spending more cash. nevertheless when? pull off you give a positive response that you require to get those all needs later having significantly cash?
