Lefebvre For Architects Thinkers For Architects:

Lefebvre for Architects Nathaniel Coleman, 2014-12-05 While the work of Henri Lefebvre has become better known in the English speaking world since the 1991 translation of his 1974 masterpiece *The Production of Space* his influence on the actual production of architecture and the city has been less pronounced Although now widely read in schools of architecture planning and urban design Lefebvre's message for practice remains elusive inevitably so because the entry of his work into the Anglosphere has come with repression of the two most challenging aspects of his thinking romanticism and Utopia which simultaneously confront modernity while being progressive Contemporary discomfort with romanticism and Utopia arguably obstructs the shift of Lefebvre's thinking from being objects of theoretical interest into positions of actually influencing practices Attempting to understand and act upon architecture and the city with Lefebvre but without Utopia and romanticism risks muting the impact of his ideas Although Utopia may seem to have no place in the present Lefebvre reveals this as little more than a self serving affirmation that there is no alternative to social and political detachment Demanding the impossible may end in failure but as Lefebvre shows us doing so is the first step towards other possibilities To think with Lefebvre is to think about Utopia doing so makes contact with what is most enduring about his project for the city and its inhabitants and with what is most radical about it as well *Lefebvre for Architects* offers a concise account of the relevance of Henri Lefebvre's writing for the theory and practice of architecture planning and urban design This book is accessible for students and practitioners who wish to fully engage with the design possibilities offered by Lefebvre's philosophy [The SAGE Handbook of Cultural Sociology](#) David Inglis, Anna-Mari Almila, 2016-05-09 Cultural sociology or the sociology of culture has grown from a minority interest in the 1970s to become one of the largest and most vibrant areas within sociology globally In *The SAGE Handbook of Cultural Sociology* a global range of experts explore the theory methodology and innovations that make up this ever expanding field The Handbook's 40 original chapters have been organised into five thematic sections Theoretical Paradigms Major Methodological Perspectives Domains of Inquiry Cultural Sociology in Contexts Cultural Sociology and Other Analytical Approaches Both comprehensive and current *The SAGE Handbook of Cultural Sociology* will be an essential reference tool for both advanced students and scholars across sociology cultural studies and media studies

[Merleau-Ponty for Architects](#) Jonathan Hale, 2016-07-01 The philosophy of Maurice Merleau Ponty 1908 1961 has influenced the design work of architects as diverse as Steven Holl and Peter Zumthor as well as informing renowned schools of architectural theory notably those around Dalibor Vesely at Cambridge Kenneth Frampton David Leatherbarrow and Alberto Perez Gomez in North America and Juhani Pallasmaa in Finland Merleau Ponty suggested that the value of people's experience of the world gained through their immediate bodily engagement with it remains greater than the value of understanding gleaned through abstract mathematical scientific or technological systems This book summarizes what Merleau Ponty's philosophy has to offer specifically for architects It locates architectural thinking in the context of his work

From Shelters to Dwellings Ayham Dalal,2022-07-04 In Zaatari camp Jordan thousands of Syrian refugees were sheltered in tents and caravans which they steadily appropriated and turned into dwellings that responded to their social and cultural needs In this book Ayham Dalal takes a closer look at this remarkable transformation He draws on the tension between the

shelter and the dwelling to unravel how new spaces unfold in between them where refugees become architects and the camp is dismantled and reassembled From Shelters to Dwellings is the first study to uniquely combine ethnographic observations with new architectural research methods to illustrate in detail how refugees inhabit shelters It is a must read for anyone interested in understanding how camps and shelters are transformed by the powerful act of dwelling **Negotiating Conflict in Lebanon** Mohamad Hafeda,2019-08-22 Drawing on innovative research into sectarian political struggle in Beirut Mohamad Hafeda shows how boundaries in a divided city are much more than simple physical divisions and reveals the ways in which city dwellers both experience them and subvert them in unexpected ways Through research based on interviews documentation of various media representations such as maps visual imagery and gallery installations Negotiating Conflict in Lebanon exposes the methods through which sectarian narratives are constructed arguing for the need to question deconstruct and transform these constructions Hafeda expands upon the definition of bordering practice by considering artistic research as a critical spatial practice which allows self reflection and transformation of border positions This study offers an alternative view to the mainstream narratives of what is meant by a border and provides insights methods and lessons that may be applied to other cities around the world affected by conflict and political sectarian segregation
