offers empirically grounded perspectives on translanguaging as a locally situated interactional accomplishment of practical
action and its significance within different domains of social life school education diasporic families and communities
workplaces urban linguistic landscapes advertising practices and mental health centres focusing on case studies from
different countries and continents The 14 chapters contribute to the understanding of translanguaging as a communicative
and discursive practice which is relationally constructed and strategically deployed by individuals during everyday
encounters with language and cultural diversity The contributions testify to translanguaging as an interdisciplinary and
critical research paradigm by assembling scholars working on translanguaging from different perspectives and a wide range
of social cultural and geographical contexts This volume contributes to the further development of new theoretical and
analytical tools for the investigation of translanguaging as everyday practice and how and why language practices are
constructed negotiated opposed or subverted by social actors Chewing Over the West ,2009-01-01 The orientation of

collection of essays provides new insights into the agency of non Western literatures in relation to the West a term used with
critical caution and like other common binary dualisms challenged here Inter cultural expertise seldom applied in the
combination of Asian African and oriental perspectives makes this compilation of essays an important contribution to the
