

Evidence for Evolution

How are DNA and comparative anatomy used to show relatedness?

Why?

“You look just like your mother!” “He has his father’s eyes.” These comments that refer to the similarities between parents and their children are heard often in conversation. These similar traits are due to the genetic material that children inherit from their parents. As humans we are sometimes fortunate enough to have three or four generations sitting in a room at one time, and we can see the similarities from generation to generation. But how much do you look like your ancestors from 100 generations ago, 1000 generations ago or more? How much of your DNA did you inherit from those ancestors? What traits do you share with them?

Model 1 – Family Characteristics

1. Model 1 is a family tree. Circle the original parents of the family.
2. How would you describe the organisms in the second row of Model 1 that are connected to the parents by a line?
3. Identify the three members of the family that “married in” by placing a star next to their figures in Model 1.
4. How are the organisms in the third line related to the organisms in the first line?

The Evidence for Evolution Alan R. Rogers, 2024-05-31 According to polling data most Americans doubt that evolution is a real phenomenon And it s no wonder that so many are skeptical many of today s biology courses and textbooks dwell on the mechanisms of evolution natural selection genetic drift and gene flow but say little about the evidence that evolution happens at all How do we know that species change Has there really been enough time for evolution to operate With **The Evidence for Evolution** Alan R Rogers provides an elegant straightforward text that details the evidence for evolution Rogers covers different levels of evolution from within species changes which are much less challenging to see and believe to much larger ones say from fish to amphibian or from land mammal to whale For each case he supplies numerous lines of evidence to illustrate the changes including fossils DNA and radioactive isotopes His comprehensive treatment stresses recent advances in knowledge but also recounts the give and take between skeptical scientists who first asked how can we be sure and then marshaled scientific evidence to attain certainty **The Evidence for Evolution** is a valuable addition to the literature on evolution and will be essential to introductory courses in the life sciences **Evolution** Michael Carter, 2019 This 80 minute lesson plan covers the evidence for evolution and fossils **The Theory of Evolution** Michael Carter, 2019 This 70 minute lesson plan covers fossils the evidence for evolution and how biogeography relates to evolutionary change **The Greatest Show on Earth** Richard Dawkins, 2009-09-10 Charles Darwin s masterpiece *On the Origin of Species* shook society to its core on publication in 1859 Darwin was only too aware of the storm his theory of evolution would provoke but he would surely have raised an incredulous eyebrow at the controversy still raging a century and a half later Evolution is accepted as scientific fact by all reputable scientists and indeed theologians yet millions of people continue to question its veracity In **The Greatest Show on Earth** Richard Dawkins takes on creationists including followers of Intelligent Design and all those who question the fact of evolution through natural selection Like a detective arriving on the scene of a crime he sifts through fascinating layers of scientific facts and disciplines to build a cast iron case from the living examples of natural selection in birds and insects the time clocks of trees and radioactive dating that calibrate a timescale for evolution the fossil record and the traces of our earliest ancestors to confirmation from molecular biology and genetics All of this and much more bears witness to the truth of evolution **The Greatest Show on Earth** comes at a critical time systematic opposition to the fact of evolution is now flourishing as never before especially in America In Britain and elsewhere in the world teachers witness insidious attempts to undermine the status of science in their classrooms Richard Dawkins provides unequivocal evidence that boldly and comprehensively rebuts such nonsense At the same time he shares with us his palpable love of the natural world and the essential role that science plays in its interpretation Written with elegance wit and passion it is hard hitting absorbing and totally convincing **Evidence for Evolution** Noel Babb, 1994-04 **Evidence of Evolution** Sue Middleton, Mary Ellen Hannibal, 2009 *Questions and Answers on Creation/evolution* John N.
