Psychology. Sielkunde, 2005 **How Workplace Behaviors Impact Mental Health: Does Diversity Matter?** Vasiliki

Eirini Chatzea, Dimitra Sifaki-Pistolla, Enkeleint A. Mechili, 2025-05-14 The recent unprecedented societal challenges along with the COVID-19 pandemic have opened the door to a new era for mental health at work. Today more than ever provides an opportunity to highlight the mental health challenges that employees are facing due to their working conditions and occupational environments. Around the globe it is well documented that promoting and establishing mentally healthy workplaces is a focal point. However, according to the literature, individuals of diverse identities and backgrounds, e.g. racial or ethnic minorities, LGBTQ community, migrants, refugees, the Roma community, religiously diverse individuals, people of lower economic social status, pregnant women, etc. are presenting an increased risk of discrimination and stigma leading to major adverse effects on their mental health. Where mental health conditions can begin and worsen in the workplace due to occupational conditions and behaviors, the impact of this continues outside of the workplace and can severely impact an individual's overall quality of life. This Research Topic aims to offer a holistic insight into the current state of mental health conditions, disorders among employees of diverse or minority groups before, during, and post the COVID-19 pandemic. This collection not only aims to capture the extent of the mental health impact and report on common work-related mental health disorders, e.g. depression, stress, distress, anxiety, burnout, low well-being, poor quality of life, etc. amongst these populations, but to open the discussion towards addressing and tackling the inequalities and stigma associated with protected characteristics in workplace environments and to propose preventive measures/interventions to enhance workplace resilience and ensure that mental health is upheld for all, both in and outside of the workplace. In addition, mapping out the current issues and needs by providing data and policy measures is crucial in meeting the United Nations' 3.4 Universal Health Coverage goal regarding promoting populations' mental health and well-being.
