

Lecture 2: Biological Examinations

Overview

Biological Examination Overview

- There are two types of biological examinations:
 - o 1. Crime scene examinations (on scene).
 - o 2. Exhibit examinations (in the laboratory).
- **IMPORTANT:** The searching, testing, and sampling techniques described herein are the same regardless of whether biological examinations are conducted on scene or during exhibit examination back in the laboratory.

The Decision-Making Process

- The CSI must decide at the crime scene whether to:
 - o 1. Conduct a biological examination at the scene or.
 - o 2. Collect evidence (exhibits) for biological examination back at the laboratory

Crime Scene Examinations	Exhibit Examinations
1. <u>Volume Crime</u>	1. <u>Major Crime</u>
2. <u>Simple examinations</u> – Requires minimal searching, testing and sampling.	2. <u>Complex examinations</u> – Requires detailed searching, testing and sampling.
3. <u>Immovable objects</u> – ie; blood spatter on a wall. May require complex examination on-scene.	3. <u>Preservation of biological evidence</u> – Avoid DNA degradation (ie; due to weather).

Please note: this model is indicative of how NSW police assess exhibit examinations. Other jurisdictions process exhibits differently.
