Americans in film before the 1970s is as important for further comprehension as is the rising political consciousness in the 1960s United States of America which found expression in the Civil Rights Movement After I have shown the background knowledge concerning Blaxploitation the description of the image of black people depicted in these movies will follow by analyzing the film Shaft and collecting other significant characteristics of this illustration in the genre in general using the literature on this topic The analysis will be divided into a plot analysis and a film analysis whereby the plot will show characteristics which are visible by a mere reflection of the storyline and setting The film analysis afterwards will have to find said aspects in selected scenes from the movie itself As the most appropriate books for the paper s intention I chose Framing Blackness by Ed Guerrero and Black and White Media by Karen Ross Another interesting work which suits as an informal guide to various Blaxploitation films is the book That s Blaxploitation by Darius James Furthermore the role and portrayal of women in these films is to be observed concerning the books by Ross and Guerrero and the analysis of Shaft On this basis I want to consider in the end whether the genre of Blaxploitation had a more positive or negative impact on the cinematic and real image of African Americans whereas this conclusion will presumably not be a simple statement of good or bad Moreover it is to be seen whether and how it influenced the social life of American black citizens and the future cinematic illustration of African Americanism
