Mexico have hung on Widespread and deep dissatisfaction with democracy may jeopardize the survival of some new democracies but the more immediate concern raised by dissatisfaction is its detrimental impact on political participation and ultimately the quality of democracy For citizens who conceive of democracy as an instrument of economic equality their governments failure to ameliorate poverty leads to disengagement from politics These citizens vote and engage in institutional participation less often Dissatisfaction also predisposes a small but significant minority of citizens to contentious political participation Political dissatisfaction makes new democracies more likely to consolidate as what scholars have described as semi partial or illiberal democracies
