Taylor, Onalee H. Johnson, 1974 Professional nurses have long been identifying and interpreting clues related to the gathering of information from which such decisions could be consistently drawn The organization systematization and clustering of such clues required an extensive search of what was meaningful to nurses in different clinical settings The research staff who designed the project as a contract to fulfill some basic goals for collecting disseminating and utilizing information data for patients records have spent 3 years refining an assessment tool with two major factors in mind First a guideline was needed to obtain the most accurate information possible about individual patients in the context of their families and the community Second an assessment tool was needed which was computer manageable in the sense that it could be adapted to an on line system of computer input and retrieval which would supply significant information to multiple sources Two major sets of assessment records have been developed from an exhaustive trial of forms in a variety of settings Consultation has been obtained from resources country wide to insure as broad a view as possible of the current efforts in the development of new record systems Faculty students and nursing service staff members in hospitals and community health agencies have participated in the trials of these forms in real situations *Nursing Administration Handbook* Howard S. Rowland, Beatrice L. Rowland, 1997 This handbook presents the concepts of the administrative process as applied to the administration of healthcare delivery The purpose of the book is to provide a roadmap for nurse administrators to use as they negotiate their way through an increasingly complex and evolving field It is a text and a hands on reference Texts such as this are needed and authors objectives are met The book is a text for students and handbook for nurse executives My judgment is that it is for graduate students and beginning managers for the most part The authors are

credible given it is their fourth edition of the book The illustrations include tables and examples of management tools that serve to highlight important points in the text References are mostly from the early to mid 1990s with some of the older more historical references The table of contents is thorough and easy to use This book covers thoroughly the concepts incorporated in the nursing administration domain The framework for organizing the chapters is an acceptable framework but not one I prefer The book is useful and the tables and examples are helpful I would recommend its use as a basic reference for graduate students in nursing administration [An Evaluation Form for Professional Staff Nurses](#) Barbara Jean Brauer,1959 [Success in Practical/Vocational Nursing - E-Book](#) Signe S.
