## Before You Begin

- **Is your software part of a Volume License Agreement (VLA)?** Contact your VLA administrator for installation instructions.
- **Are you upgrading from a previous version of LabVIEW?** Refer to the *LabVIEW Upgrade Notes* on the LabVIEW Platform DVD 1 for information about protecting existing VIs and projects before installing a new version of LabVIEW.

## 1 Install LabVIEW, Modules, and Toolkits

- Insert the LabVIEW Platform DVD 1 and follow the onscreen instructions.
- When prompted, enter the serial number for each product you want to activate. Locate each serial number on the software package or *Certificate of Ownership*.

**Note:** Application Builder requires its own serial number only if you purchased the LabVIEW Base or Full Development System.

## 2 Install NI Device Drivers

- Insert the NI Device Drivers DVD when the installer prompts you to **Install Hardware Support** or after LabVIEW finishes installing.
- Select drivers for any hardware with which you want to use this version of LabVIEW.

**Note:** If you cannot locate a particular driver on the **Features** screen of the installer, use the driver media packaged with the device or download the latest version of the driver from [ni.com/drivers](http://ni.com/drivers).

## 3 Install Hardware

Refer to your device documentation, such as printed manuals or PDFs, for information about installing your NI hardware.

## Problems Installing LabVIEW?

For answers to common questions about installing LabVIEW and NI device drivers, refer to the *LabVIEW Installation Troubleshooting Guide* ([troubleshooting\\_guide.html](#)) on the LabVIEW Platform DVD 1.

Characterisation of Soft Magnetic Materials Under Rotational Magnetisation Stanislaw Zurek, 2017-11-22 The book presents practical aspects related to the measurement of rotational power loss in soft magnetic materials The book furthermore focuses on practical aspects of performing such measurements the associated difficulties as well as solutions to the most common problems Numerous practical aspects hands on experience and most commonly encountered pitfalls are heavily discussed in the book The text begins with introduction to magnetism then follows with definitions of measurement methods of rotational power loss from physical viewpoint Two chapters describe and detail the various sensors which can be employed for such measurements as well as all the aspects of designing making and using a magnetising apparatus A synthesis of the likely optimal design of a magnetising apparatus is also given preceded with the full reasoning based on all the research carried out to date Characterisation of Soft Magnetic Materials Under Rotational Magnetisation serves as an excellent starting point for any student having to perform magnetic measurements under rotational magnetisation but also under 1D 2D or 3D excitation Because the methods sensors and apparatus are extensively discussed it will also be a great reference for more senior researchers and experts in the field There is a whole chapter devoted to analysis of measurement uncertainty This subject is rarely published for magnetic measurements which makes it more difficult for all researchers to understand the concepts and methodology used in uncertainty estimation This chapter not only introduces the whole subject but also provides multiple step by step examples which can be easily followed from very simple cases to much more complex ones All equations are presented with full SI units which greatly helps in practical application of the presented methodology Each chapter is written in such a way that it can be studied on its own so that the reader can focus only on the specific aspects as required

Online Engineering & Internet of Things Michael E. Auer, Danilo G. Zutin, 2017-09-14 This book discusses online engineering and virtual instrumentation typical working areas for today s engineers and inseparably connected with areas such as Internet of Things cyber physical systems collaborative networks

and grids cyber cloud technologies and service architectures to name just a few It presents the outcomes of the 14th International Conference on Remote Engineering and Virtual Instrumentation REV2017 held at Columbia University in New York from 15 to 17 March 2017 The conference addressed fundamentals applications and experiences in the field of online engineering and virtual instrumentation in the light of growing interest in and need for teleworking remote services and collaborative working environments as a result of the globalization of education The book also discusses guidelines for education in university level courses for these topics

**Trends in Advanced Intelligent Control, Optimization and Automation** Wojciech Mitkowski, Janusz Kacprzyk, Krzysztof Oprzędkiewicz, Paweł Skruch, 2017-06-06 This volume contains the proceedings of the KKA 2017 the 19th Polish Control Conference organized by the Department of Automatics and Biomedical Engineering AGH University of Science and Technology in Kraków Poland on June 18-21 2017 under the auspices of the Committee on Automatic Control and Robotics of the Polish Academy of Sciences and the Commission for Engineering Sciences of the Polish Academy of Arts and Sciences Part 1 deals with general issues of modeling and control notably flow modeling and control sliding mode predictive dual etc control In turn Part 2 focuses on optimization estimation and prediction for control Part 3 is concerned with autonomous vehicles while Part 4 addresses applications Part 5 discusses computer methods in control and Part 6 examines fractional order calculus in the modeling and control of dynamic systems Part 7 focuses on modern robotics Part 8 deals with modeling and identification while Part 9 deals with problems related to security fault detection and diagnostics Part 10 explores intelligent systems in automatic control and Part 11 discusses the use of control tools and techniques in biomedical engineering Lastly Part 12 considers engineering education and teaching with regard to automatic control and robotics

**Power Systems Research and Operation** Olexandr Kyrylenko, Serhii Denysiuk, Ryszard Strzelecki, Ihor Blinov, Ievgen Zaitsev, Artur Zaporozhets, 2023-11-21 This book covers new technologies and methods related to models for short term forecasting of electricity imbalances in the IPS of Ukraine taking into account the impact of forecasts of energy production from renewable sources on the accuracy of the imbalance forecast The book proposed architecture and mathematical model of an artificial neural network for deep learning forecasting of short term electricity imbalances using hourly data Using a model to aggregate data with an hourly resolution followed by forecasting to reduce forecast error the quasi dynamic modeling method was used to analyze the impact of periodic generation on the network The application of quasi dynamic modeling also allows taking into account the system load curve generation profile storage system as well as renewable energy sources RES operation in this area The use of models makes it possible to achieve realistic estimates of generation for the required period The book considers a local hybrid renewable energy system HRES based on different types of RES which is more efficient than a system with one type of source

**Laser Spectroscopy and Laser Imaging** Helmut H. Telle, Ángel González Ureña, 2018-04-17 a very valuable book for graduate students and researchers in the field of Laser Spectroscopy which I can fully recommend Wolfgang Demtré der Kaiserslautern University of

Technology How would it be possible to provide a coherent picture of this field given all the techniques available today The authors have taken on this daunting task in this impressive groundbreaking text Readers will benefit from the broad overview of basic concepts focusing on practical scientific and real life applications of laser spectroscopic analysis and imaging Chapters follow a consistent structure beginning with a succinct summary of key principles and concepts followed by an overview of applications advantages and pitfalls and finally a brief discussion of seminal advances and current developments The examples used in this text span physics and chemistry to environmental science biology and medicine Focuses on practical use in the laboratory and real world applications Covers the basic concepts common experimental setups Highlights advantages and caveats of the techniques Concludes each chapter with a snapshot of cutting edge advances This book is appropriate for anyone in the physical sciences biology or medicine looking for an introduction to laser spectroscopic and imaging methodologies Helmut H Telle is a full professor at the Instituto Pluridisciplinar Universidad Complutense de Madrid Spain ngel Gonz lez Ure a is head of the Department of Molecular Beams and Lasers Instituto Pluridisciplinar Universidad Complutense de Madrid Spain *Mechanical Engineering, Materials and Energy* Grace Chang,2011-12-22 Selected peer reviewed papers from the 2011 International Conference on Mechanical Engineering Materials and Energy ICMEME 2011 October 19 21 2011 Dalian China **The LabVIEW Student Edition** Lisa K. Wells,1995 **Learn Labview 2012 Fast** Douglas Stamps,2013 **Learn LabVIEW 2012 Fast** is written for users that have no experience with LabVIEW and only a limited understanding of automatic data acquisition This primer will help you quickly become proficient using LabVIEW and confident in your ability to create applications in a wide variety of data acquisition topics The goal of this primer is to introduce you to LabVIEW for hands on use in automatic data acquisition and controls applications This primer uses a number of practical real life examples to provide both breadth and depth to the topic The real life examples used in this book demonstrate the value of LabVIEW provide motivation for learning LabVIEW and make the examples fun to program The first chapter of this book is designed to introduce you to the general concepts of LabVIEW through the development of a general program that acquires analog input data The rest of the book introduces you to general concepts of data measurement and generation using LabVIEW s DAQ Assistants Express VIs and the configuration approach for automatic data acquisition This primer has a unique modular structure that does not require the chapters to be completed in succession After you complete the first chapter you are free to complete whichever sections you would like in the order you would like to complete them allowing you to focus on the topics that are of most interest to you Each section in the primer introduces you to a new data acquisition topic After an introduction to the topic a program is developed within this topic using step by step instructions Each chapter concludes with several additional practical application problems where the data acquisition program is given but the detailed steps to create the program are left to you Example problems are provided for all modes of data acquisition including analog input and output digital input and output and counters For example the problems show many aspects of

analog input such as hardware and software timing buffered and triggered acquisition and examples with common sensors such as thermocouples and strain gages Examples from other acquisition modes show how to drive many common output devices such as stepper motors servo motors and DC motors as well as software control programs such as the PID compensator and pulse width modulation

**LabVIEW** Ian Fairweather, Anne Brumfield, 2011-12-12 LabVIEW™ has become one of the preeminent platforms for the development of data acquisition and data analysis programs LabVIEW™ A Developer's Guide to Real World Integration explains how to integrate LabVIEW into real life applications Written by experienced LabVIEW developers and engineers the book describes how LabVIEW has been pivotal in solving real world challenges Each chapter is self contained and demonstrates the power and simplicity of LabVIEW in various applications from image processing to solar tracking systems Many of the chapters explore how exciting new technologies can be implemented in LabVIEW to enable novel solutions to new or existing problems The text also presents novel tricks and tips for integrating LabVIEW with third party hardware and software Ideal for LabVIEW users who develop stand alone applications this down to earth guide shows how LabVIEW provides solutions to a variety of application problems It includes projects and virtual instrumentation for most of the programs and utilities described Many of the authors own software contributions are available on the downloadable resources

**Labview**, 1999 **LabTutor** John K. Eaton, Laura Eaton, 1995 LabTutor a combined book and software system provides an introduction to the principles and practice of laboratory data acquisition experimental control and data processing using any hardware software system It includes specific instructions and examples on how to use LabVIEW a graphical programming language from National Instruments used for developing automated instrumentation systems LabTutor allows new users to make effective use of laboratory computers with as little as ten hours of effort and to become accomplished practitioners with less than forty hours of effort The printed version offers the convenience and readability of an ordinary book while the hypertext version includes sound and animation to clarify certain concepts and offers the advantage of rapid searching making it useful as an online manual LabTutor can be used as a primary package for a course on laboratory computers as a supplement in traditional laboratory courses or as a self guided tutorial for those learning to use laboratory computers on their own
