

## QUESTION

What is the effect of different colors of light on the growth of plants? Do the colors of the spectrum affect photosynthesis? How does the color of the light affect the rate of photosynthesis?

## HYPOTHESIS

My hypothesis is that leaves under red and blue will grow the most, under yellow and green light will grow the least. The hypothesis is based on the absorption spectrum of chlorophyll.

## MATERIALS

- 1 2-foot green board
- 1 2-foot battery
- 1 battery
- 1 thin coated wire (about 18")
- 1 connecting tape
- 15 disposable plastic drinking cup
- 150 lights (red, blue, green, yellow, and white)
- 10 purple and 10 yellow paper
- 4 digital camera

## PROCEDURE

1. Make a circuit that will change the color of light from green to red.
2. Connect a 150 LED lights to the battery to make a color change circuit.
3. Place each LED light under the top of a cup.
4. Place under the experiment, use a board of 2-foot width with water and soil in it.
5. Put all the disposable plastic drinking cups under the light and place the soil in it.
6. Use 10 purple and 10 yellow paper to cover the soil.
7. Use 1 of each plants under LED light in the system, the other under 150 LED light, green light, yellow light, and red light. Put on the LED light and leave for 24 hours.
8. Measure the height of the plants and record growth differences in color and shape changes of the leaves.

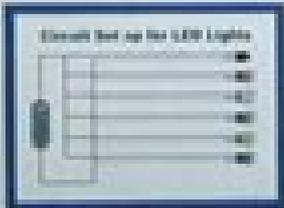

# What Color of Light is Important for Photosynthesis?

## DATA

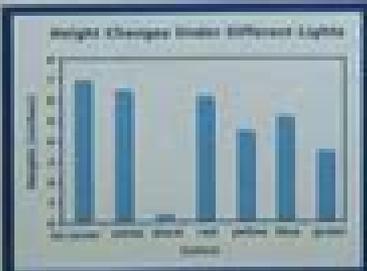

Color Change of leaves under light

Color	Height (cm)	Leaf Area (cm²)	Stomatal Conductance (µmol m⁻² s⁻¹)	Chlorophyll a (µg cm⁻²)	Chlorophyll b (µg cm⁻²)	Carotenoids (µg cm⁻²)
Red	15	12	0.15	1.2	0.8	0.5
Blue	12	10	0.12	1.0	0.7	0.4
Green	8	8	0.08	0.8	0.6	0.3
Yellow	5	5	0.05	0.5	0.4	0.2
White	10	9	0.10	0.9	0.6	0.3

## RESULTS

From the data we can see that plants under red and blue light grow tallest and have leaves turning red and blue, respectively, and to understand, leaves under green light do not really turn a color to green after 24 hours. Under light green and white, leaves turn green, but not as tall as plants exposed to the photosynthesis of red and blue light. Red light gives strongest response of photosynthesis, and light under green and white shows different color of light and it is more a color change in leaves of green to blue.

## CONCLUSION

My experiment supported my hypothesis. Leaf size differences by different color of lights. The results showed that red and blue are most suitable color of light for photosynthesis. Plants under green and white light show little change. Under light red and blue, leaves turn red and blue, respectively. The height of plants light in red and blue is highest. The height of plants light in green and white is lower than red light, which means photosynthesis is slower but is essential to the experiment. To have continuous color change after the growth of plants, each plant produced green leaves that the plant under white light. Based on my results, it is possible to find the best color of light for photosynthesis. It is possible to find the best color of light for photosynthesis with different plants under different colors. This being a more detailed experiment, to test various plants, and to test the color of light. The study could help plant grow by giving them color, or to plant new plants to existing, to understand the color of light.

## ABSTRACT

Photosynthesis is a process producing food for plants. Chlorophyll captures sunlight in a leaf for photosynthesis. The purpose of this project was to find out what color of light is essential for photosynthesis. Synthetic water provided under different colors of LED lights for 24 hours (short, medium, and long term changes were recorded) to determine which is the best color. Under white light, plants grow well. The results showed that red and blue light are most suitable to make photosynthesis. Under light red, plants are the strongest of photosynthesis and maximum increase. Green light was least suitable.

## FUTURE CONSIDERATION

My initial thought about the growth was to use leaves plant, but the leaves plant I placed under green light, so I used an indoor plant to compare. I compared that I used the same color from each of the five color plants during the experiment. In a future study, I will use different colors of plants and different seasons.

### **Example Of Science Project Board Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Example Of Science Project Board has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Example Of Science Project Board has opened up a world of possibilities. Downloading Example Of Science Project Board provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Example Of Science Project Board has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Example Of Science Project Board. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Example Of Science Project Board. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Example Of Science Project Board, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Example Of Science Project Board has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available

and embark on a journey of continuous learning and intellectual growth.
